EUSALP ACTION GROUPS

1. To develop an effective research and innovation ecosystem
2. To increase the economic potential of strategic sectors
3. To improve the adequacy of labour market, education and training in strategic sectors
4. To promote inter-modality and interoperability in passenger and freight transport
5. To connect people electronically and promote accessibility to public services
6. To preserve and valorise natural resources, including water and cultural resources
7. To develop ecological connectivity in the whole EUSALP territory
8. To improve risk management and to better manage climate change, including major natural risks prevention
9. To make the territory a model region for energy efficiency and renewable energy

ABOUT

Interreg Alpine Space

Interreg Alpine Space connects players from various sectors and different policy levels from the programme's seven countries (Austria, France, Germany, Italy, Liechtenstein, Slovenia and Switzerland). They cooperate to tackle common challenges, develop new working methods, and bring advanced solutions which can be turned into policies. Sharing their experience and expertise, project partners work towards improving the quality of life for 66 million people in one of the most unique areas of Europe. Projects supported by the programme help to make the Alpine Space more innovative and low-carbon, valorise natural and cultural heritage and contribute to improve governance.

EUSALP

The EU Strategy for the Alpine Region (EUSALP) is based on a joint initiative of Alpine states and regions to strengthen cooperation among them and to address common challenges in a more effective way. Seven countries (Austria, France, Germany, Italy, Liechtenstein, Slovenia and Switzerland) and 48 regions are involved in it. The EUSALP aims at addressing Alpine-specific challenges, such as the balancing of development and environmental protection, the enhancement of competitiveness, and the reduction of territorial disparities.

How do I get involved?

Calls for project proposals are opened on a regular basis. They are published on the Interreg Alpine Space website.
