First analysis of the survey online

Aim of the analysis

To find out if any examples of links between silos exists

Multi-level governance

- Collaboration with other institutions/companies at **different governance levels?**

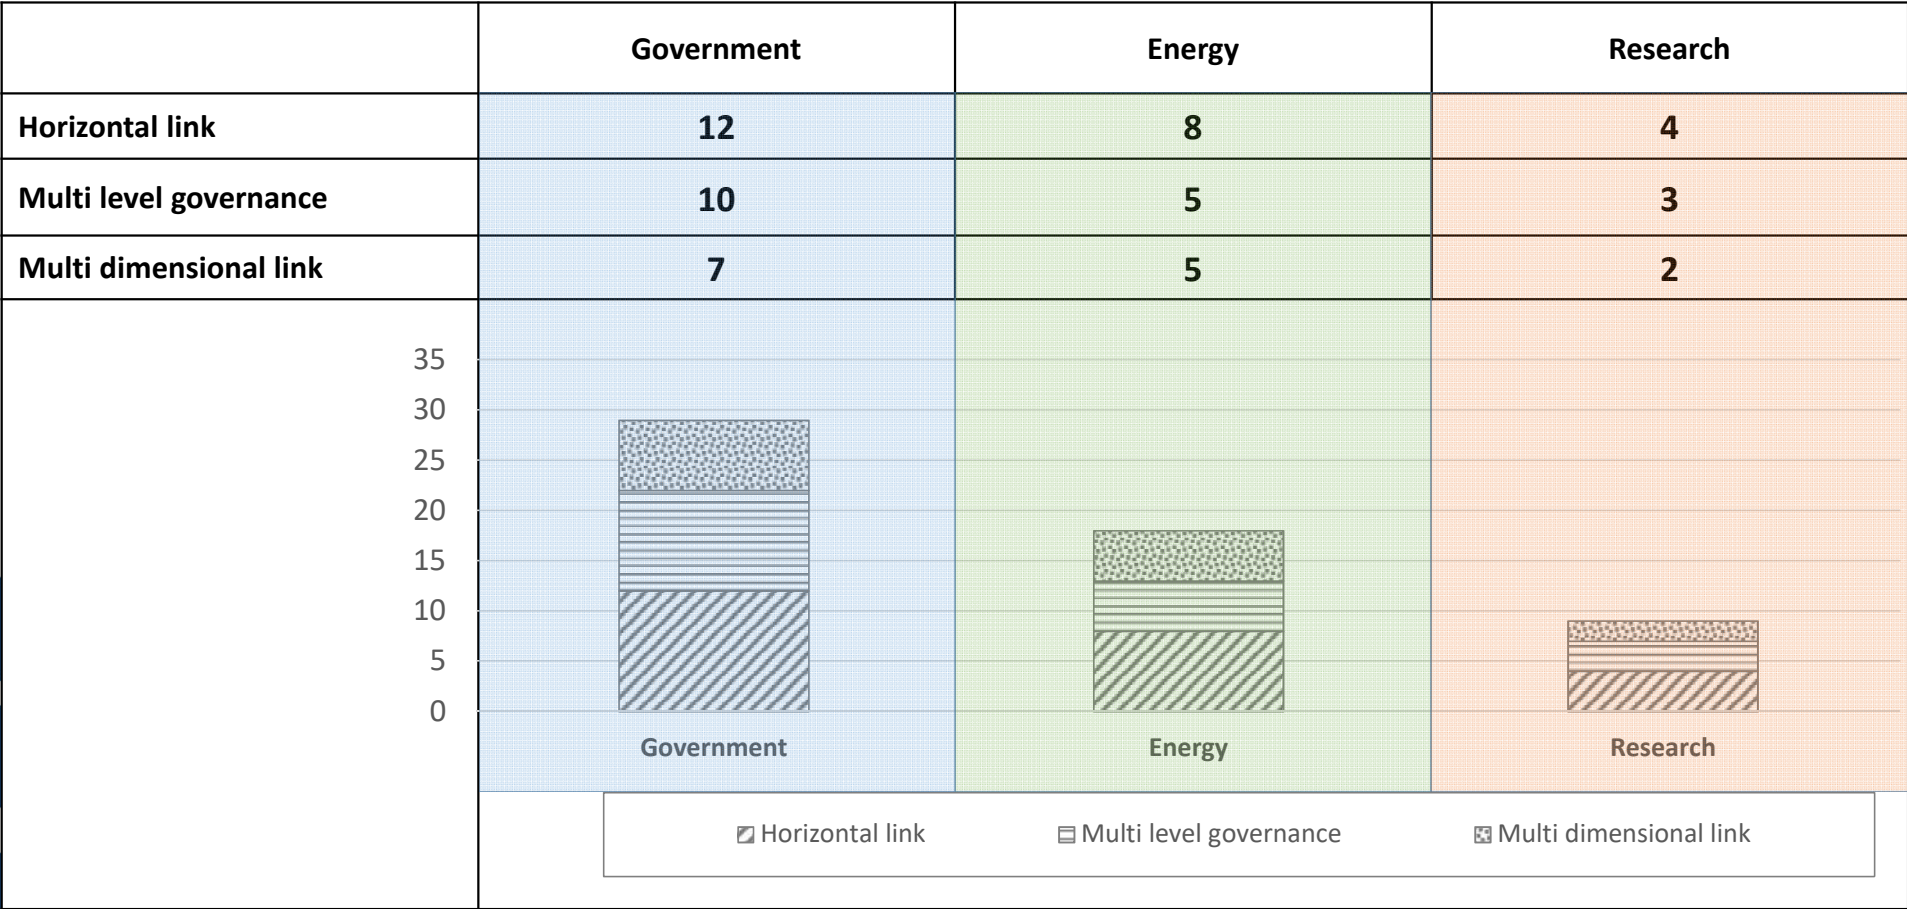

Multi-dimensional link

- Collaboration with other institutions/administrations acting in **different sectors?**
- Best cases to involve **stakeholders with different background, needs and interests?**
- Examples of comprehensive energy/climate concepts that take into account implementation aspects such as smart grids, storage or new energy market models?
- Which sectors beyond energy have been involved in the development and/or implementation of such comprehensive concepts?

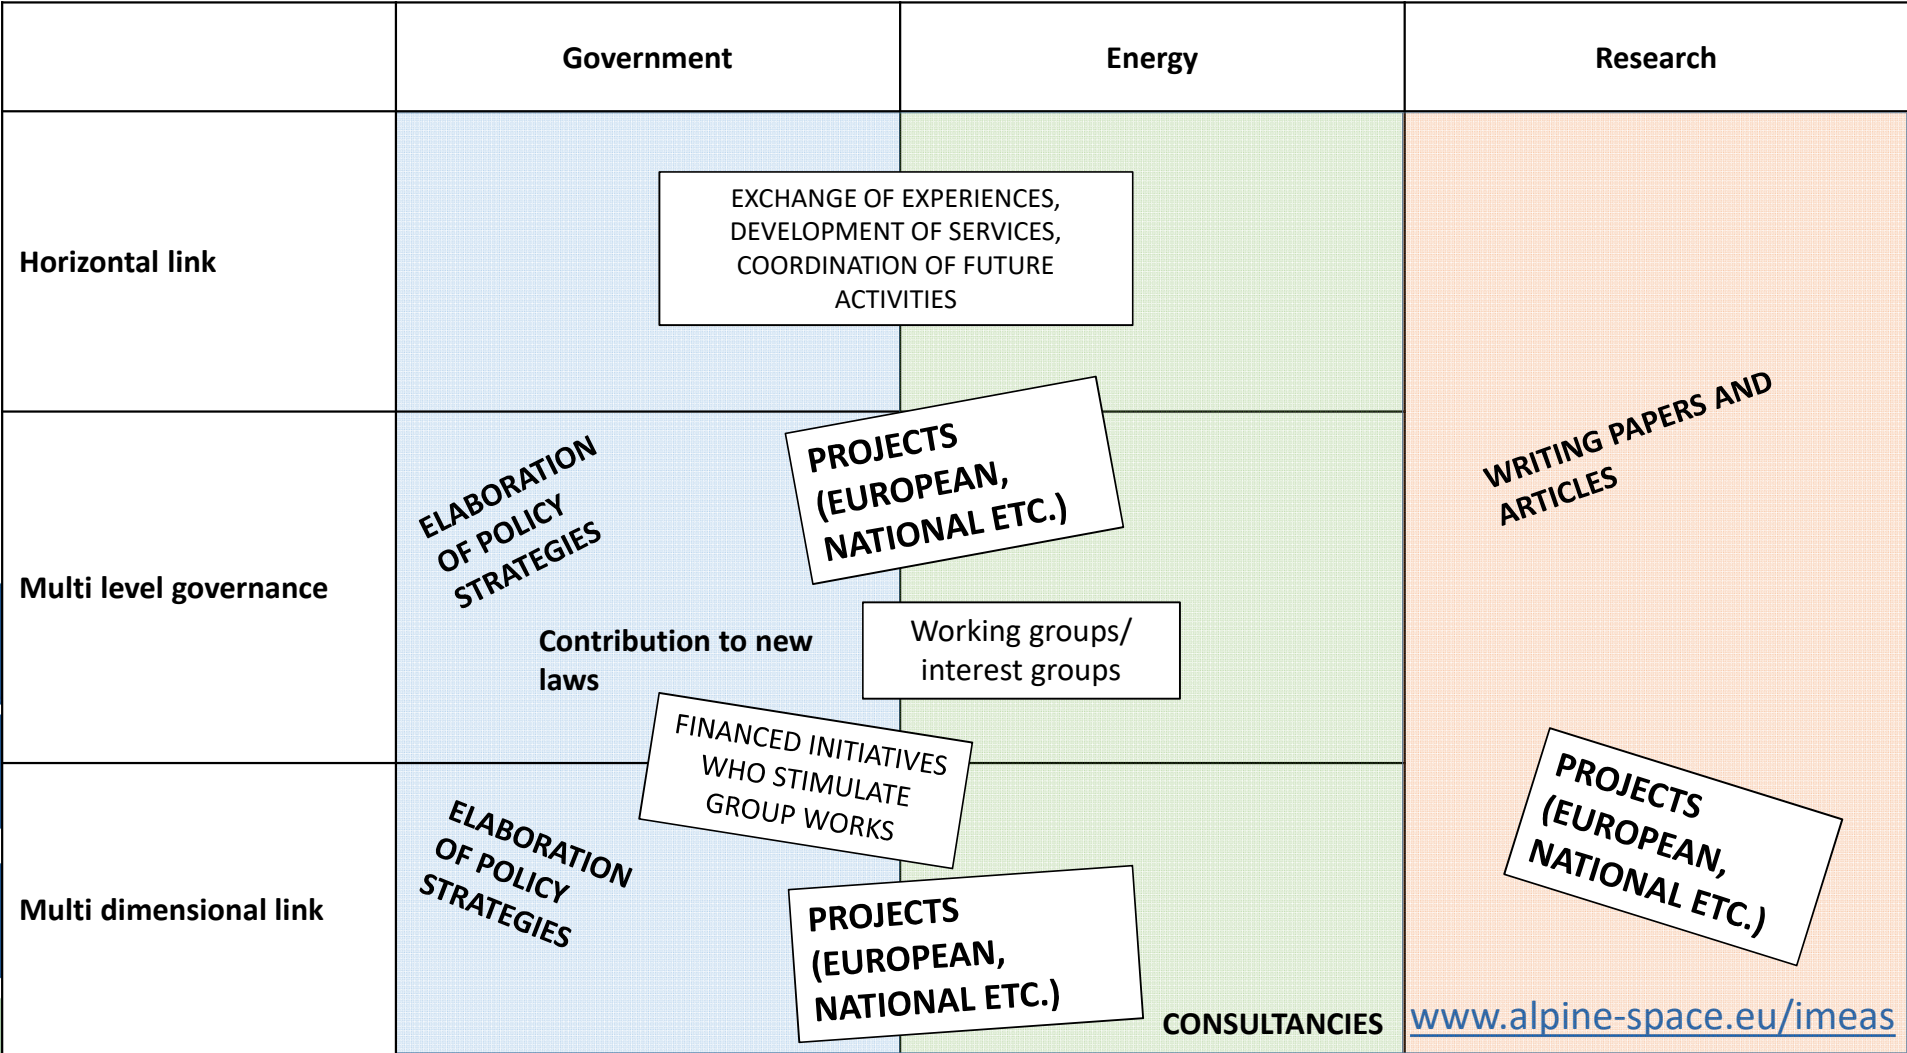

Horizontal link

- Does your institution/company collaborate with other institutions/companies with the same institutional mission and operational goals?
