# PROMOTING EXCELLENCE IN DUAL EDUCATION

DuALPlus PROJECT FINAL PUBLIC CONFERENCE

Copyright: Lustenau, Masal

Dual education plays an important role for a successful transition from education to work, for improving the skills supply and in fostering entrepreneurship and innovation. Yet, the dual education systems in the Alpine Space have various challenges to face, such as the lack of attractiveness for young people who rather opt for an academic career, the inclusion of marginalised groups from the job market, demographic change and adaptation to an increasingly digitalised world.

In the DuALPlus project funded by the Alpine Space Programme (Interreg), nine partner organisations from eight regions joined forces to increase attractiveness and improve the quality of dual education in the Alpine space over the last three years.

On **July 22nd, 2021**, we would like to invite you to **Munich, Germany**, to explore and discuss the outcomes of our project with us and together with other recognised experts for dual education from the EU, the Alpine regions and the scientific world.
