Quality criteria - ecological connectivity potential

The elaboration of Strategic Alpine Connectivity Areas (SACA) approach was one of the main challenges of the ALPBIONET2030 project.

This classification of the alpine and EUSALP area in three types of categories offering the possibility to better target https://alparc.org/alpine-resources/atlas-alpbionet2030 actions in favor of ecological connectivity has led to an innovative cartography of the 2 alpine territory.

Multifunctional Open Spaces in the Alps

Interreg Alpine Space Kick-off conference 2021-2027 Dr. Guido Plassmann - ALPARC

Spatial development and distribution within the EUSALP perimeter.

<u>Level of spatial</u> <u>development:</u>

Indicator for the coverage of infrastructure components and their disruptive spatial effects.
