Results of thematic session B

“Move your mountains” session

The aim of this session was to offer a **networking and matching opportunity** to the project participants along the seven specific objectives of the programme.

Based on the mountains (identifying remaining needs/challenges in their specific objective) they had created the day before, the participants met in groups of about 3 people to turn these needs/challenges into ideas for potential projects. This was done on a “**mountain range**” **template**, which structured the discussion to identify joint objectives, activities and solutions to the identified challenges and was a starting point for developing ideas and partnerships.

After drawing the outline of their own mountain and naming the common challenge, the teams discussed the following:

- proposed solution to the identified challenge,
- expected change/result,
- concrete steps towards the solution,
- what could be difficult project phases.
