How to lower  
carbon footprint  
and increase  
energy efficiency  
of your heating  
system

**HEATING  
SYSTEMS**

**4**

This project is co-financed by the European  
Regional Development Fund through the  
Interreg Alpine Space programme.

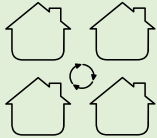

# SUITABILITY GUIDELINE

These guidelines were developed within the BB-Clean project to help the end user. 4 guidelines are focused on an important topic of reducing emissions. Choosing a right heating system can be a difficult task. To help you choose, check suitability guideline for heating systems below.

---

This project is co-financed by the European Regional Development Fund through the Interreg Alpine Space programme.

Heating system	Symbol	Advantages	Caution
Wood pellets		<ul style="list-style-type: none"> <li>o Suitable for all buildings</li> <li>o Low fuel costs (regional differences)</li> <li>o High operating convenience</li> <li>o CO<sub>2</sub>-neutral</li> <li>o Regional added value (regional differences)</li> <li>o Combination with solar thermal plant</li> </ul>	<ul style="list-style-type: none"> <li>o Storage room for wood pellets and suitable chimney are required</li> <li>o Buffer storage guarantees optimal efficiency</li> <li>o Quality and origin of pellets essential (ENplus certificate)</li> </ul>
Firewood		<ul style="list-style-type: none"> <li>o Low (no) fuel costs (e.g., using own wood)</li> <li>o CO<sub>2</sub>-neutral</li> <li>o Regional added value</li> <li>o Combination with solar thermal plant</li> </ul>	<ul style="list-style-type: none"> <li>o Storage room for firewood and suitable chimney are required</li> <li>o Buffer storage recommended</li> <li>o Quality and origin of firewood essential</li> </ul>
Wood chips		<ul style="list-style-type: none"> <li>o Low (no) fuel costs (e.g., using own wood)</li> <li>o High ease of use</li> <li>o CO<sub>2</sub>-neutral</li> <li>o Regional added value</li> <li>o Combination with solar thermal plant</li> </ul>	<ul style="list-style-type: none"> <li>o Storage room for wood chips (access for delivery) and suitable chimney are required</li> <li>o Buffer storage recommended</li> <li>o Quality and origin of wood chips essential</li> </ul>
Geothermal heat pump		<ul style="list-style-type: none"> <li>o Recommended for houses with very good thermal insulation</li> <li>o No dirt &amp; low noise emissions during operation</li> <li>o Low space requirement in the building</li> <li>o High ease of use &amp; low operating costs</li> <li>o CO<sub>2</sub>-neutral operated with renewable electricity</li> </ul>	<ul style="list-style-type: none"> <li>o Not suitable for buildings with high heating demand → low temperature system (underfloor heating) is necessary</li> <li>o Permission for vertical deep drilling necessary</li> <li>o Appliances with high coefficient of performance (COP&gt;4) are required</li> </ul>

Heating system	Symbol	Advantages	Caution
Air heat pump		<ul style="list-style-type: none"> <li>o Recommended for houses with very good thermal insulation</li> <li>o No dirt emissions during operation</li> <li>o Low space requirement in the building</li> <li>o High ease of use</li> <li>o CO<sub>2</sub>-neutral operated with renewable electricity</li> <li>o Low operating costs</li> </ul>	<ul style="list-style-type: none"> <li>o Not suitable for buildings with high heating demand → low temperature system (underfloor heating) is necessary</li> <li>o Devices with high coefficient of performance (COP&gt;4) are required</li> <li>o Attention to the location of outdoor devices due to possible noise emissions</li> </ul>
District heating		<ul style="list-style-type: none"> <li>o No dirt &amp; noise emissions during operation</li> <li>o Low space requirement</li> <li>o High operating comfort</li> <li>o Low maintenance costs</li> </ul>	<ul style="list-style-type: none"> <li>o Location with district heating grid necessary</li> <li>o Heat supply contract</li> <li>o High investment costs</li> </ul>
Gas		<ul style="list-style-type: none"> <li>o No dirt and low noise emissions during operation</li> <li>o Low space requirement</li> <li>o High ease of use</li> <li>o Low PM-emissions</li> <li>o Use of Biogas is CO<sub>2</sub>-neutral</li> </ul>	<ul style="list-style-type: none"> <li>o Use condensing boiler</li> <li>o Increase of efficiency through a combination with solar thermal plant and low temperature systems (underfloor heating)</li> <li>o Possible legal restrictions for installations in new and refurbished buildings</li> <li>o CO<sub>2</sub>-emissions</li> </ul>

Heating system	Symbol	Advantages	Caution
Oil		<ul style="list-style-type: none"> <li>o High ease of use</li> <li>o No dirt and minimal noise emissions during operation</li> </ul>	<ul style="list-style-type: none"> <li>o Use condensing boiler</li> <li>o Increase of efficiency through a combination with solar thermal plant and low temperature systems (underfloor heating)</li> <li>o Oil storage space required</li> <li>o Possible legal restrictions for installations in new and refurbished buildings</li> <li>o CO<sub>2</sub>-emissions</li> </ul>
