REPUBLIC OF SLOVENIA
MINISTRY OF INFRASTRUCTURE

Current state – public accessible infrastructure

Electricity – Recharging stations:

- 50 stations on the TEN-T network 43 -50 kW
- 155 stations - < 22 kW
- 92 station – 3,7 kW

No interoperability among different providers

European Regional Development Fund

Number of vehicles - BEV

	UP TO				TARGETS
	2016	2017	2018 (1 – 9)	TOTAL	2020
BEV	449	361	373	1.183	5.311
PHEV	111	168	No data	279	6.033
LPG	8.380	500	No data	8.880	32.789
CNG	122	50	No data	172	2.558

Regarding the public accessible charging infrastructure we could have more than 6000 BEV.

REPUBLIC OF SLOVENIA
MINISTRY OF INFRASTRUCTURE

Measures

- Exemption of the tax for the state roads (mobility tax)
- Subsidies for BEV & plug in hybrid vehicles - PHEV categories M1, N1, L1e, L3e, L6e and L7e
 - 7.500 € for BEV
 - 4.500 € for PHEV categories M1, BEV N1;
- Loan for BEV and PHEV vehicles, motorcycles and electric bikes purchase with CO2 emissions less than 110 g/km (10 years – cca 200 € per month for Leaf)
- Lower tax (0,5%) for motor vehicles with CO2 emissions less than 110 g/km
- Free parking places and free charging (depends on counties or shopping centres, ...).

REPUBLIC OF SLOVENIA
MINISTRY OF INFRASTRUCTURE

Good practices

- **Car sharing system in the cities Ljubljana, Maribor, Murska Sobota, Kranj and at the Airport Ljubljana:**
 - only BEV vehicles
 - Ministries and agencies are partners in the system to use BEV for the travels inside the cities
- **Public procurement - obligation to purchase green vehicles when buying them with public money**

REPUBLIC OF SLOVENIA
MINISTRY OF INFRASTRUCTURE

Summary of the National Strategy on Alternative Fuels

- National strategy on the deployment of alternative fuels infrastructure (October 2017)

- Vision:
Slovenia will limit the registration of the private vehicles and light duty vehicles categories M1 and MG1 and N1 which will have higher **CO₂ than 100 g/km after 2025** and decrease this level to **50 g/km after 2030**.

REPUBLIC OF SLOVENIA
MINISTRY OF INFRASTRUCTURE

Environmental objectives - SI

- Mitigate the impact of transport on environment
- More specific:
 - Attain GHG objectives - (CO₂) – e.g. SI - OP GHG: up to 2020: + 28%; up to 2030: + 18% compared with 2005
 - Decrease pollutants – especially PM in cities
- What kind of fleet we should have in 2030 to reach above mentioned goals

OBJECTIVES - Private cars

Refuelling points - H2 ²	1	1	5 - 9	5 - 9

STRATEGY - MEASURES

REPUBLIC OF SLOVENIA
MINISTRY OF INFRASTRUCTURE

Action plan 2018 - 2020

- 1 public accessible charging point/7 BEV
 - Promotion/stimulation of smart grids
 - Changing legislation and removing administrative burdens (parking policy, introducing plates for BEV, simplification to get subsidies, subsidies for test vehicles, charging points in block of flats, ...)
 - Subsidies - continuation
 - Recommendation to local communities
-

For the future:

- Shall we continue with positive incentives or to introduce negative incentives (e.g. tax for diesel vehicles more than 10 years old, prohibit enter in the city centres, ...)???
- Obligations for industry regarding CO2, mandatory sale of certain number of BEV (like China)???
- ...

REPUBLIC OF SLOVENIA
MINISTRY OF INFRASTRUCTURE
