- **Appendix 2: Form A + Form B**  32
1 INTRODUCTION

The Deliverable 1.1.2 is a part of the first output in the WPT1 A.T1.1 Database of the existing strategies. As stated in the AF, the purpose of the database “will consist of general/sector specific SGI strategies (macro-regional, national, regional and intercommunal level). It will provide basic data on strategies and be a necessity for further work in WPT2 and WPT3.” It is one of the strategic elements project will develop to improve the framework conditions for innovation, in this case for the better and more efficient provision of the SGI.

It is the major important input for the think-tank platform since it will provide the ground for the bench marking for different stakeholders, relevant for the provision of the SGI in the Alpine Space. These stakeholders are able to learn about provision’s approaches from different countries through browsing the basic/detailed profiles of the documents (strategies, policies, regulation), and they can also download them/browse them in the web. The database is publically available on the link: http://intesi.at/about/work-package-t1/ as the result of the WPT1. To provide durability, the database will be later moved to the think-thank platform. Among the major potential users are:

- local/regional/national public authorities,
- sectoral agencies,
- infrastructure and (public) service providers.

Additional, the database could be also useful to the European Commission, since it contains the major regulation on SGI for all five participating Alpine countries.

The database includes 257 documents (Appendix 1) of the examined SGI sectors (general, regional development, basic goods, social care, education, health, infrastructure, transport), which are of strategic (strategies, guidelines, plans) and legal (legislative acts) importance for the delivery of SGI. Austria participated 36 documents in the database, France 59, Italy 59, Slovenia 45, and Switzerland 58. When making the selection, the countries also tried to aim for a balanced representation of the documents at all administrative levels (national, regional, local).

The input for the database was according to the partners contributed by:

- AT – Tirol: Josef Danner, Jakob Egg, Daniela Kern, Michaela Perktold, Riedel Manfred, Günter Salchner, Eva-Maria Schiestl, Johannes Schöch, Walter Ernestine (AT – Tyrol);
- AT – Carinthia: Jörg Putzl, Hans Schuschnig
- France: Tania Hoogteiling, Adrien Devos, Guillaume Doukhan, Jean Horgues-Debat / Francois Trusson, Nicolas Sizaret;
- IT – Lombardy: Cristina Pellegrino, Daniela Brioschi;
- IT – Bolzano: Clare Guliani, Christian Hoffman;
- SI: Špela Kolarič, Barbara Černič Mali, Vlasta Damjanović;
- CH: Peter Niederer, Thomas Egger.
2 SELECTION AND COLLECTION OF THE DATA/DOCUMENTS

The preparation of the on-line database was done in these steps:
1. Preparation of the preliminary list of the strategies to be included into the database (by PPs)
2. Discussion and negotiation about the list of the strategies and open questions (each of the PPs with UL) -> formation of the final list (.doc) with the basic data (.xls)
3. Preparation of the basic/detailed profiles (by PPs)
4. Review of the prepared profiles and feedback to the partners (UL)
5. Update of the profiles -> final .xls document as an input for the database
6. Preparation of the technical solution
7. Publishing of the database on-line

2.1 Instructions for the preparation of the list

The list was done by the partners in the .xls form. The file was divided into the sheets of which each represented one sector. The list should have included documents from the following sectors: General (not specific to any sector) / Regional Development / Transport / Telecommunication / Basic goods (shops) / Health / Social care / Education. If all sectors were not included, PPs explained this in the accompanying .doc document.

Each sheet had 7 columns in which PPs inserted:
_ name of the document in the original language
_ (translated) name of the document in English
_ administrative level of the document
_ type of the document
_ year of adoption
_ (foreseen) duration
_ comments

PPs got the following instructions for filling in the table:
For filling in the table, please use only the categories specified for each element below. If you have some troubles doing so, please explain this in the extra column titled Comment.

The categories for the elements are:
_ Name of the document in the original language: insert the name of the document in the original language.
_ (Translated) name of the document in English: insert the name of the document in English (if there is an original translation) or translate the name of the document by yourself. We need this to arrange the documents according to the content and to enable their general understanding across the Alpine space.
_ Administrative level: federal or national / state or province / regional / intercommunal / municipal
In the case where your country is federal, please use “state” for the “Länder” level.
2.2 Feedback on the preparation of the list
Until May 15th UL collected lists of the strategies from Austrian, French, Italian and Slovene partners; the list for the Swiss partners was still missing. We performed a check-up of the extent and content of the lists. The documents suggested for the final list and inclusion into the database were coloured green.

Figure 1: Pyramid of documents to be inserted into the database. (Author: Š. Kolarič)
The criteria for the final selection of the documents were in line with the material sent in to the partners in advance. The following characteristics were recognized as important:

1. A document is of strategic importance (federal, national, regional, inter-municipal level) or it represents a major law.

2. A document concerns one of the following sectors: general, e.g. development strategies, a constitution), regional development, basic goods, social care, education, health, infrastructure, transport. In case documents were submitted concerning other sectors or policy fields, e.g. climate change, tourism, energy, they were not marked in the list in green colour and will not be taken into account in the future analyses.

3. We have taken care that there is a balance between the presence among different types of documents and different levels on which the documents were adopted and are implemented, e.g. in case of prevalence of local documents, we have pre-selected the most relevant for you.

4. In case when the same document occurred in the tables of two partners, we have marked the document for one partner and for the other “delete” it. This was done in a way that there is a balance between the partners.

According to these instructions PPs themselves reported (in the D2.2.2 Transnational workshop) the following criteria for the selection of the documents:

- administrative level (IT),
- focus on territorial impact (IT),
- validity of documents (SI, CH),
- indication of sectors (IT), coverage of different sectors (IT),
- availability of the documents (AT), e.g. nothing on basic goods (CH, Si),
- type of documents – laws, ordinances, regulation (AT, CH),
- presence of the integration approach (AT, CH),
- number of the strategies available (SI, CH).

In the overview deficiencies were marked which PPs needed to address before the documents could have become part of the database. The cells to be rechecked were coloured yellow. In the most cases, PPS were provided with the tasks in the Comments section. One of the following corrections were necessary (according to the columns) as the following instructions were given to the PPs:

- **(Translated) name of the document in English:** Check if the translation of the document is official or was provided by you. Especially, in the second case, the translation should be professional and corresponding to the title of the document.

- **Administrative level:** Due to the mix of federal and non-federal countries, there is a difficulty of how to diversify between different administrative levels. According to the country, the use of the categories (federal or national / state or province or cantonal or departmental / regional / intercommunal / municipal) should be following:
  - Austria: federal / state / regional / intercommunal / municipal
  - France: national / departmental / regional / intercommunal / municipal
  - Italy: national / provincial / regional / intercommunal / municipal
2.3 Collection of the documents

After the initial list was prepared and basic data was provided, PPs as part of the Deliverable 1.1.1 Regional collection of the strategies, provided the files of these documents. Documents were collected as .doc/.docx/.pdf formats.

To ease, the later work, each of the (strategy) documents was saved with the following name: Countryabbreviationconsequentnumber_NUTS code_major words from the title_yearofadoption.doc/.docx/.pdf. Example would be SI01_NUTS1_Nationalspatial development strategy_2004.pdf.

Country abbreviations are the following: AT – Austria, CH – Switzerland, DE – Germany, FR – France, IT – Italy, SI – Slovenia.

Partners were provided both, with the list of NUTS and the list of LAUs in the co-operating countries.

More on the collection in the D 1.1.1. Regional collections of strategies.

2.4 Preparation of the basic/detailed profiles of the documents

According to the tasks of the WPT1 UL needed to collect also more detailed information on the strategic documents. PPs could have gathered in the following ways:

- By reading and analysing the document and its content.
- By reading and analysing the supporting documents, e.g. explanatory documents, regulation etc.
- By gathering the data through the interviews.

The data to be inserted in by the PPs was visible from the provided columns in the .xls Tables_EXTENSION.xls. First PPs inserted one row at the top of the table, then copy-paste these columns into the final version of table – with cleaned list of the documents. Initial data cells were extended on the basis of the Form A and B (Appendix 2).

The categories and detailed explanations for the elements are:

-Legally binding/non-binding: Please, choose one of these two options for the analysed documents.
Types of services of general interest covered: insert which services of general interests are covered. Insert abbreviations: SGI – services of general interest (general coverages), SGEI – services of general economic interest, NSGI – non-economic services of general interest, SSGI – social services of general interest.

Integration as a concept for delivery of services:
   a) Integration mentioned: Insert Yes or No.
   b) Insert X to the governance elements that are mentioned for the integration.

<table>
<thead>
<tr>
<th>Actors</th>
<th>Policies</th>
<th>Administrative levels</th>
<th>Financial sources</th>
<th>Others</th>
</tr>
</thead>
<tbody>
<tr>
<td>x</td>
<td>X</td>
<td>Insert</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

c) Provide a short description how. Here describe shortly how integration is mentioned (objectives, measures). You can also insert the quotes from the documents.

Major objectives, defined in the strategy in regards to the delivery of SGI: Please, list the major objectives of the document related to the SGI. In [ ] write the number of objectives, connected to the SGI / sum of all objectives that are listed in the document. E.g. [3/6]

Short summary: Please, insert short summary in ENG of the documents. The summary should be up to 500 to 750 words.

Governance models, foreseen by the strategy for the delivery of SGI. From the documents, please, elaborate
   a) whether the strategy predicts centralized or decentralized delivery of the services. Insert the right combination: centralised / decentralised / centralised, decentralised.
   b) Select which models are foreseen for the delivery of SGI and mark it with ‘x’. Under Other you can also write other models mentioned in the document.

<table>
<thead>
<tr>
<th>Public service</th>
<th>Concession</th>
<th>Public-private partnership</th>
<th>Co-operative</th>
<th>Others</th>
</tr>
</thead>
</table>

Measures of the strategy, adopted for the delivery SGI: Shortly list that are mentioned in the document for the delivery of SGI. Separate them with ‘/’.

Type of finances, available for the delivery of strategy (public/private, ratio): Select (mark with X) which if any financial sources are available for the delivery of the strategy and whether these sources are private or public. Again, mark with X.
   a) Administrative level of available financial resources

<table>
<thead>
<tr>
<th>EU</th>
<th>Federal/national</th>
<th>State/cantonal/provincial</th>
<th>Regional</th>
<th>Local</th>
<th>No sources available.</th>
</tr>
</thead>
</table>

b) Source of the finance:
   Private    Public
Stakeholders, responsible for the implementation of the SGI delivery according to the strategy: under each of the administrative levels, please, list the stakeholders who are responsible for the implementation of the SGI.

<table>
<thead>
<tr>
<th>Administrative level</th>
<th>List of actors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Federal/national</td>
<td></td>
</tr>
<tr>
<td>State/provincial/departmental</td>
<td></td>
</tr>
<tr>
<td>Regional</td>
<td></td>
</tr>
<tr>
<td>Inter-communal</td>
<td></td>
</tr>
<tr>
<td>Local</td>
<td></td>
</tr>
</tbody>
</table>

3 TECHNICAL SOLUTION

The database is using MySQL as a database server, which is required for easier importing, access to data, filtering and other data manipulation. All administration of the database is done through the XLSX file (MS Excel or other compatible software) which is then converted to CSV and imported into MySQL.

Importing of the data into the database is done through a special import program which first creates a list of columns, creates a table with those columns and then inserts the data into the created table. This is done because of the possibility of adding or removing columns at a later time.

All frontend is coded in HTML and Javascript, while the logic behind filtering results, creating and downloading PDFs and other aspects of the database, is written in PHP scripting language, which is commonly used in web development.

Everything was designed with speed in mind, so users are never more than one click away from the profiles; also there are quick links to attached PDF documents and URL in the list. Filtering is smart and done on-the-fly, which means that results are updated as soon as an item in a filter is selected, and all the values of other filters get updated with the updated results too. Users can view multiple profiles at once, and create PDF of that profiles, which is generated on the server, and then shown to users, which can then print or save the PDF.
4 INSTRUCTIONS FOR THE USE OF THE DATABASE

The database has a cover page (information about the database, browser) and a subpage, on which the detailed information for each documents are shown upon clicking on the document. Below the information about the database (objectives, preparation) a browser in a form of pull-down menus enables the search. The following elements can be chosen:

- **Country** (Austria (Tirol), Austria (Carinthia), France, Slovenia, Switzerland, Italy (Lombardy), Italy (Bolzano)),
- **Sector** (general, transport, regional development, basic goods, health, social care, education, telecommunication),
- **Type of the document** (strategy, guideline, legislation, programme, EU programme, resolution, report, agreement, operational programme),
- **Integration as a concept** (yes/no)
- **Legally binding** (yes/no).

*Figure 2: Print screen of the cover page*
The user can either select just one category or choose a combination of different selection criteria, e.g. Sector, Type of document. After selection the list of the relevant documents appears underneath. The basic contains the following elements: name of the country, sector, type of the document, name of the document (English), document in .pdf (download option) and a link to the webpage, where one can find the document. On the cover page it is also possible to choose the next steps:

1. Save list as .pdf: list, shown on the screen can be saved on the user’s hard disk for the further use/work.
2. Detailed profiles of selected documents can be shown (open in a new window).

The detailed profiles of selected documents are either basic or detailed (more in-depth information on the integration elements). Again, it is possible to either look at the profiles on-line or save them as a .pdf on the user's hard disk. The link underneath the title of the documents also enabled looking at the individual policy document (and saving it).

The basic profile consists of the following information:
- Country
- Name of the document (original)
- Name of the document (English)
- Administrative level
- Type of the document
- Year of adoption
- Foreseen duration
- Comments
- Review
- Territorial unit (NUTS/LAU)
- Authority
- URL
- Availability in English
- Legally binding
- SGI coverage
- Integration as a concept: Yes/no
- Integration – governance elements: Actors / Policies / Adm. Levels / Fin. Sources / Others
- Description
- Major objectives
- Short Summary

The detailed profiles provide also the following information:
- Governance models: Centralised/decentralised
- Governance models: Public services / Concession / Public-private partnership / Co-operative / Others / Comments
**Measures**

- Type of finances: EU / Federal/national / State/cantonal/provincial / Regional / Local / No sources available.
- Source of finance: private/public
- Stakeholders’ list: Federal/national / State/provincial/departmental / Regional / Inter-communal / Local
- Stakeholders’ comments

*Figure 3: Print screen of a detailed profile*

This law applies to services regulated by provincial law, which fall within the scope of the directive 2006/123/EC (Services Directive) and are offered by a service provider established in an EU member state or in another contracting state of the EEA agreement. It reduces bureaucratic obstacles for service providers during the establishment of branches or in the case of short-term cross-border stays. The Directive on Services applies across different sectors and covers principally all independently provided services. Some activities are explicitly excluded from the coverage of this directive. Such exceptions include non-economic services of general interest (activities provided by the state or on behalf of the government), including electronic communication, transport services, health services, etc.
5 STRENGTHS AND WEAKNESSES OF THE DATABASE

Since the preparation process of the database was complex and long, at the end of it one can state both, strengths and weaknesses. Among the strengths we can list:

- The database represents a comprehensive view over the documents, relevant in the ASP area.
- The content of the documents (not always available in English language) is summarized into English (from German, Italian, French, Slovene) which enables the transnational comparison of the content (important for the ASP goals).
- The database presents a good ground for work in the frame of the Macroalpine strategy.
- The database was besides researchers prepared also by the policy makers (national/regional public authorities’ representatives) which increases its relevancy.
- The database include the active links to the webpages on which documents are available on-line which increases its durability (in case the government’s webpages/registers do not change the on-line addresses).

As weaknesses need to be mentioned:

- The selection of the documents was done in co-operation between each of the PPs and UL on the bases of the lists PPs provided. Therefore the database and selection of the documents rely on the individual PPs and their knowledge of the existing policies and regulation in the countries, regions, states.

  In the D2.2.2 Transnational workshop PPs also reported the obstacles regarding the preparation of the content for the database. Among the obstacles for the collection of the documents discussed with the UL were a low quantity of the documents translated in English (in Carinthia most of the documents are only available in German), ever changing documents (Austria, Switzerland), the ratio between private and public (issue was raised by Italians), and a lack of specific strategies for each sector (also an Italian issue). The Slovenians also mentioned a large quantity of the documents, and the language problem which, together with the inflexible administration, impedes the entrance of the foreign services providers on the Slovenian market, especially in the cross-border areas. The Swiss raised an issue that the quantity of the documents to be collected was too large (in case the collection was conducted for all of the sectors and all of the cantons in the country).

- The database contains 256 documents and for each of them a lot of data was gathered. Since the documents are in different languages and amount of the documents is big, the PPs are responsible for the content of the national profiles. UL could not have checked all the profiles properly content-wise, therefore some errors might appear.
- The database presents an overview in a moment of time (year 2016). We spanned the period of the documents’ collection, so that some changes in the regulation that happened last year could be taken into account. However, the database will not be updated after January 2017 in case of documents’ changes, since the WPT1 will finish and funds for the database in the frame of the project will run out.
Appendix 1: List of the documents in the database (by country and sector)

The documents marked with red are presented with the detailed profiles.

**AUSTRIA**

**TIROL (BLT)**

15 strategies to analyse in the form B, 24 altogether in the database.

**General:**
- Österreichisches Raumentwicklungskonzept ÖREK 2011 / Austrian Spatial Development Concept
- Tiroler Raumordnungsgesetz TROG 2011 / Tyrolean Spatial Planning Law
- ZukunftsRaum Tirol_2011 / Future Space Tyrol
- Nachhaltigkeitsstrategie Tirol TNHS 2012 / Sustainability Strategy Tyrol
- Tiroler Gemeindeordnung / Tyrolean Municipality Organization Law
- Tiroler Dienstleistungsgesetz TDG / Tyrolean Law on Services

**Regional development**
- Österreichisches Programm für ländliche Entwicklung 2014 – 2020 / Austria - Rural Development Programme
- Lokale Entwicklungsstrategie Außerfern 2014 – 2020 / Local Strategy - Rural Development Außerfern
- LAG Regionsmangement Osttirol / Local Action Group Regional Development Osttirol
- Regionalwirtschaftliches Entwicklungsprogramm für die Naturparkregion Lechtal-Reutte / Regional Economy Development Program for Nature Park Region Lech – Außerfern

**Transport:**
- Tiroler Straßengesetz / Tyrolean Road Law
- Fernpass Strategie / Strategy for Fernpass

**Telecommunication:**
- Telekommunikationsgesetz 2003 - TKG 2003 / Austrian Telecommunication Law
- Breitbandstrategie Austria 2020 / Austrian Broadband Strategy
- Breitband-Masterplan für Tirol / Broadband Masterplan for the Tyrol

**Basic goods:**
- Tiroler Einkaufszentrenprogramm / Tyrolean shopping centre program

**Health:**
- Österreichischer Strukturplan Gesundheit ÖSG 2012/ Austrian structural health plan
- Tiroler Krankenanstaltenplan 2009 / Tyrolean hospital plan
- Regionaler Strukturplan Gesundheit RSG Tirol - ambulantes Modul / Regional structural plan health of the Tyrol - ambulant module
- Österreichische Demenzstrategie Abschlussbericht / Austrian dementia strategy final report

**Social care**
- Strukturplan-Pflege 2012-2022 - Land Tirol / Structure plan Care for the State of Tyrol
- Soziales Leitbild Außerfern / Social Concept Außerfern

**Education:**
- Tiroler Schulorganisationsgesetz 1991 / Tyrolean Schoolorganisation Law
- Tiroler Kinderbildungs- und Kinderbetreuungsgesetz / Tyrolean Childhood Education and Care Law

**CARINTHIA**
12 strategies to analyse in the form B, 12 altogether in the database.

**Regional development:**
- Lokale Entwicklungsstrategie derLAG Nockregion-Oberkärnten 2014-2020 / Local development strategy for Nockregion
- Kärntner Raumordnungsgesetz / Carinthian Spatial Planning Law
- Kärntner Gemeindeplanungsgesetz / Carinthian Municipality Planning Law
- Strategische Landesentwicklung Kärnten / Strategic development Carinthia
- Demografische Wandel - Trends und Perspektiven / Demographic change - trends and perspective

**Transport:**
- Kärntner Straßengesetz / Carinthian Road Law
- Regionalverkehrsplan / Regional traffic plan
- Mobilitätstransplan Kärnten / Mobility master plan Carinthia

**Telecomunication:**
- Breitbandmasterplan für Kärnten / Broadband masterplan for Carinthia

**Basic goods:**
- Kärntner Einkaufszentrenverordnung / Carinthian shopping centre program

**Health:**
- Regionaler Strukturplan Gesundheit Kärnten 2020 / Regional Health Care Structure Plan Carinthia 2020
Social care:
- Pflegekonzept / Care concept

FRANCE (ADRETS on behalf of French partners)
31 documents for a detailed analysis, 59 altogether in the database.

General:
- Loi NOTRe (Nouvelle organisation territoriale de la République) 7 août 2015 / « NOTRe » Act of August 7th 2015 (New territorial organisation of the Republic)
- Loi Montagne 9 janvier 1985 / Mountain Act [document is in the renewal process]
- LOI n° 2014-58 du 27 janvier 2014 de modernisation de l'action publique territoriale et d'affirmation des métropoles (1) / The law for Modernisation of Territorial Public Action and Affirmation of the Metropolis (known as the MAPAM law) January 27th 2014
- Schéma départemental de Coopération intercommunale de l'Isère 2011 / Isère departmental plan for intercommunal Cooperation (2011)
- Schéma départemental de Coopération intercommunale de Savoie / Savoie departmental plan for intercommunal Cooperation (2011)
- SDCI Schéma départemental de Coopération Intercommunale 2011 Alpes de Hte-Provence / Alpes de Haute Provence departmental plan for intercommunal Cooperation (2011)

Regional development:
- Loi n° 2005-157 du 23 février 2005 relative au développement des territoires ruraux / February 23th Act about rural areas development
- PDR PACA (Programme de développement rural régional) 2014-2020 / Rural development programme (Regional)- PACA 2014-2020
- PACA SRADDT Schéma régional d'aménagement et de développement durable du territoire à 2030 / PACA Regional Spatial Planning and Development Blueprint 2030
- Convention interrégionale de massif des Alps 2015/2020 / Interregional agreement for Alpine massif 2015/2020
- Schéma de services Pays de Maurienne / Pays de Maurienne Public service plan (2016)
- ScoT de la région grenobloise (Trièves partenaire) / Grenoble Territorial Cohesion blueprint
- Scot de l'Oisans / Oisans Territorial Cohesion blueprint
- Scot Pays de Maurienne / Pays de Maurienne territorial Cohesion blueprint
- Charte de développement Pays de Maurienne / Pays de Maurienne Development Charter (2004)
- Leader Alpes Sud Isère 2014-2020 Accompagner le territoire vers de nouvelles opportunités de développement économique / Alpes Sud Isère LEADER (Supporting territory towards new economic development opportunities) 2014-2020

Transport:
- LOTI n°82-1153 du 30 décembre 1982 sur les transports intérieurs / The act of December 30th 1982 about domestic transport
- Schéma régional des transports PACA 2006 / PACA Regional Transportation Plan 2006
- Schéma régional des services de transport (SRST) 2013/2020 Auvergne Rhône Alpes / Auvergne Rhône Alps regional transport service scheme 2013 -2020
- Contrat de Plan Etat Région (CPER) Rhône Alpes2015 – 2020 / State / Region planning contract 2015-2020
- Délibération 28 mars 2013 : Politique de développement de l'écomobilité / Regional political framework for ecomobility 28/3/2013
- Délibération décembre 2010 : "Adaptation du dispositif des Comités de Ligne" / Regional political framework for improving local transport commissions between service providers and customers / passengers
- Délibération juin 2014 : "Plan d'action Services aux voyageurs / Regional political framework concerning new services offered in railway stations

Telecommunication:
- SCORAN (Stratégie de Cohérence Régionale d'Aménagement Numérique ) PACA / PACA Regional Cohesion strategy for Digital planning (2011)
- Rhône Alpes Numérique / Digital Rhône –Alpes Act
- Schéma Directeur Territorial d'Aménagement Numérique de la Savoie 2012 / Territorial outline plan for digital development in Savoie 2012
- Schéma Directeur Territorial d'Aménagement Numérique du département de l'Isère 2011 / Territorial outline plan for digital planning in Isère 2011
- Schéma directeur territorial de l'aménagement numérique 2012 Alpes de Haute provence / Alpes de Haute Provence Territorial outline plan for digital development (2012)

Health:
- Loi n° 2009-879 du 21 juillet 2009 portant réforme de l'hôpital et relative aux patients, à la santé et aux territoires / July 21st 2009 Act about Hospital, patients, health and territories (known as HPST Act)
• LOI n° 2016-41 du 26 janvier 2016 de modernisation de notre système de santé (Loi Touraine) / January 26th 2016 about modernisation of health care system
• Reduction des inégalités d'accès à la santé des Rhinalpins / Reducing inequality of access to health services for regional citizens
• Schéma regional d'organisation des soins ARS 2012-2016 PACA / PACA Regional Health Program 2012-2016
• Schéma régional d'organisation des soins 2012-2017 Rhône Alpes / Rhône Alpes regional Health programm/Plan

Social care:
• LOI n° 2002-2 du 2 janvier 2002 rénovant l'action sociale et médico-sociale / The act of January 2nd 2002 reforming social and medico-social intervention
• Loi n° 2005-102 du 11 février 2005 pour l'égalité des droits et des chances, la participation et la citoyenneté des personnes handicapées / The act of February 11th 2005 for equal rights and opportunities, participation and citizenship of disabled people
