### EXPLORE RIVER BASIN MANAGEMENT AND ECOSYSTEMIC SERVICES

My River Kit is a simple game that aims at exploring and analyzing river dynamics & protection with all kind of public. Round after round, the players manage and develop their city exploring and discussing the perception they have of environmental indicators and the value they give to it.

#### 6 STEPS – 2 HOURS

1

**Setting up** : take the material and read the rules booklet, this game is designed to be played in autonomy !

2

**Launch first round** : you are the Mayor of a city, implement activities on your territory. What kind of development will you favour ?

3

**Run first round** : water flows and players pick and return water to the flow according to their activity.

4

**Monitoring** : environmental indicators are to be assessed and discussed downstream

5

**Discuss potential changes, implement new activities and begin 2<sup>nd</sup> round**

Water treatment

Urbanization

Ecosystemic services

Landscape beauty

Leisure

...
