Territory in 150 words Briefly describe the territory and point out to main social, economic, cultural, political and environmental characteristics.				
<p>The Massif des Bauges is located in the northern French Alps, Its 64 municipalities cover an 856 km² area distributed among two Departments (Savoie and Haute-Savoie). The administrative border of the territory perfectly fits the natural ones. The territory appears such a rocky fortress, a preserved natural island of 70 000 inhabitants, emerging as a single thrust from urbanized valleys of 450 000 inhabitants and 6 big cities. 24 600 ha (28%) of natural areas present an European interest and are protected by different French policies (as the Wild Fauna National Reserve). The Park is responsible for sustainable development policy on the territory and its Regional Nature Park Charter defines a sustainable development plan for 12 years including economic development (agriculture, forestry, and tourism), education and preservation of heritages. It gives support to the communities on country planning. The Park develops recreational and discovery activities based on the enhancement of heritages. It drives a museums and outdoors sites network which welcome local visitors and tourists. The Park also works closely with the farmers and foresters in order to develop these two major economies while preserving resources and biodiversity. It helps to promote local products like cheeses, honey, wines, aromatic and medicinal plants, chocolate ... linked with the territory and to develop denominations of origin.</p> <p>PNRMB supports a strong environmental education and youth sector and many activities like the Young Nature Guides initiative. Many youth activities and pedagogical tools are developed within a formal covenant with the National Education Authority. The Park leads a network of 35 local education professionals, with a broad panel of competences. 64 municipalities, 11 local authorities, 2 Departments and the Rhone-Alpes Region are directly involved in the administration council of the park with their elected representatives. The park will have to update its Charta in 2019 and plans to include concrete youth governance measures in it. The park council as well as some park's municipalities are foreseen as pilot sites within GaYA.</p>				

Where do we want to go?	3 main developmental challenges: <i>List three main developmental challenges of the territory in the next 10 years.</i>
