

e-SMART Interview Series

In the interview series, e-SMART partners talk to a variety of stakeholders of the project, including representatives of municipalities and the private sector, mobility planning agencies, transport companies as well as research institutions. The interviews will cover different aspects of e-mobility, focussing on local public transport and last mile freight logistics.

Branka Leskovšek, Post of Slovenia

How to increase e-mobility solutions in the last-mile logistic sector? In the first e-SMART interview, Branka Leskovšek speaks about experiences and challenges while electrifying the fleet of the Post of Slovenia.
