### The S3-Innovation Model - Transformative Activities for Regional Development

The S3-Innovation Model introduces a systematic process for the identification, development and implementation of transformative activities. It offers a set of tools for cluster initiatives and regions to explore capacities and opportunities for transformation and to develop actions to create critical mass in innovative new fields.

You will find detailed information on the conceptual background, the process and the tools of the S3-Innovation Model in the sections below.

A complete overview of the S3-Innovation Model will be available in the final publication of the project.

Discover the final publication: Smart Specialisation Strategies with Smart Clusters - A New Approach to Generating Transformative Activities (<https://www.alpine-space.eu/projects/s3-4alpclusters/en/project-results/final-publication/final-publication>).
