1 Homepage

The homepage is accessible at <https://smart-villages.eu>.

On the homepage, you can find several sections to explore.

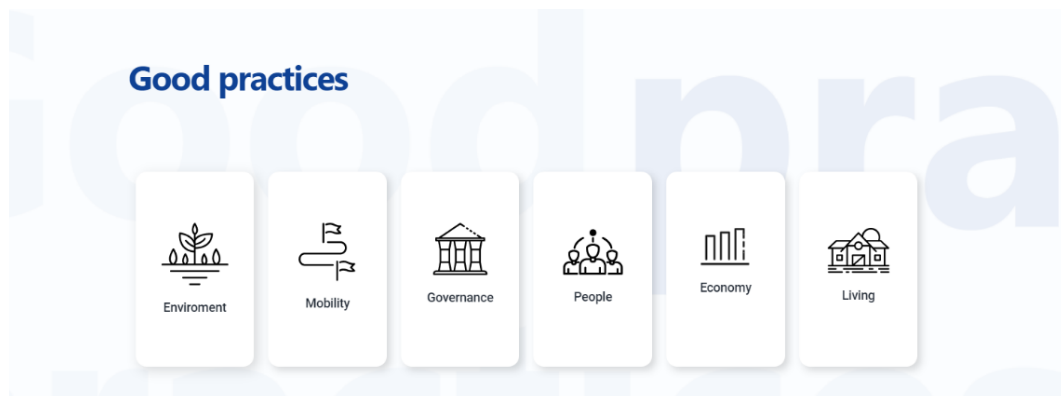

1.1 Smartness survey and Good practices

In this section you can start assessing your smartness or explore good practices provided by other users.

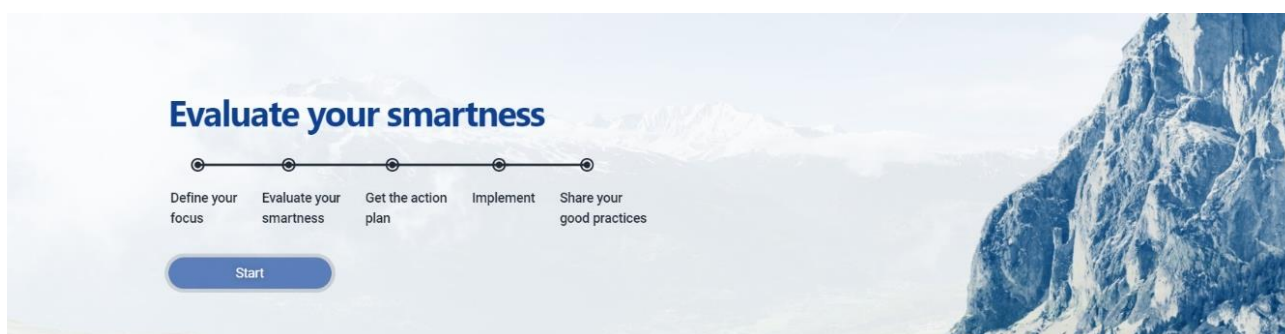

1.2 Good practices

In the **Good practices** section, you can explore examples of good practices in different domains, such as the environment, mobility, governance, economy and living , by clicking on the dimensions presented.

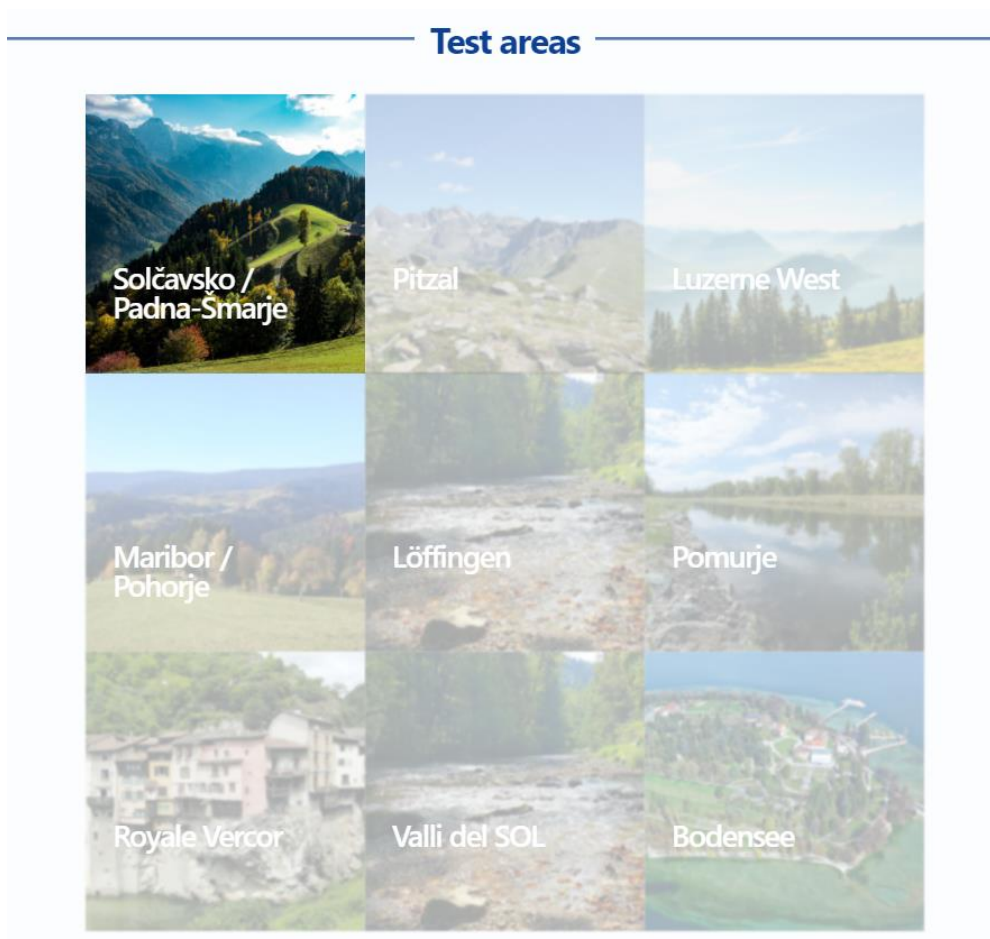

1.2 Smartness

In the **Smartness** section, you can start assessing the level of smartness of your place of living.

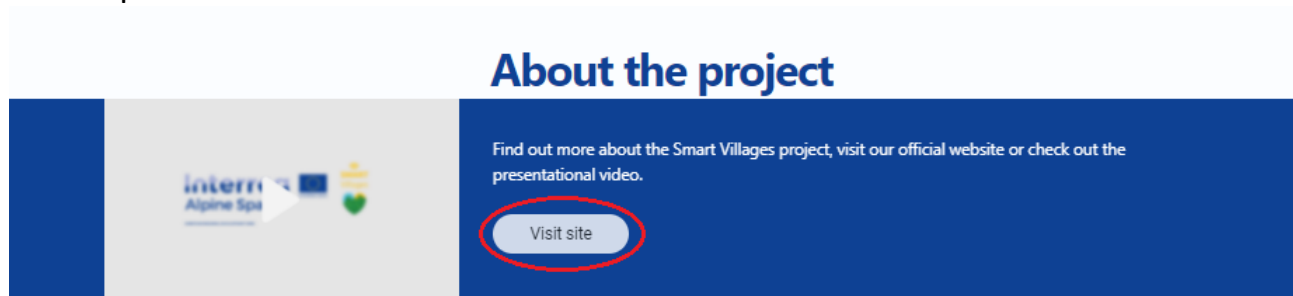

1.3 Test areas

In the **Test areas** section, you can explore the SmartVillages project's test areas, which are building and exchanging on their Good Practices.

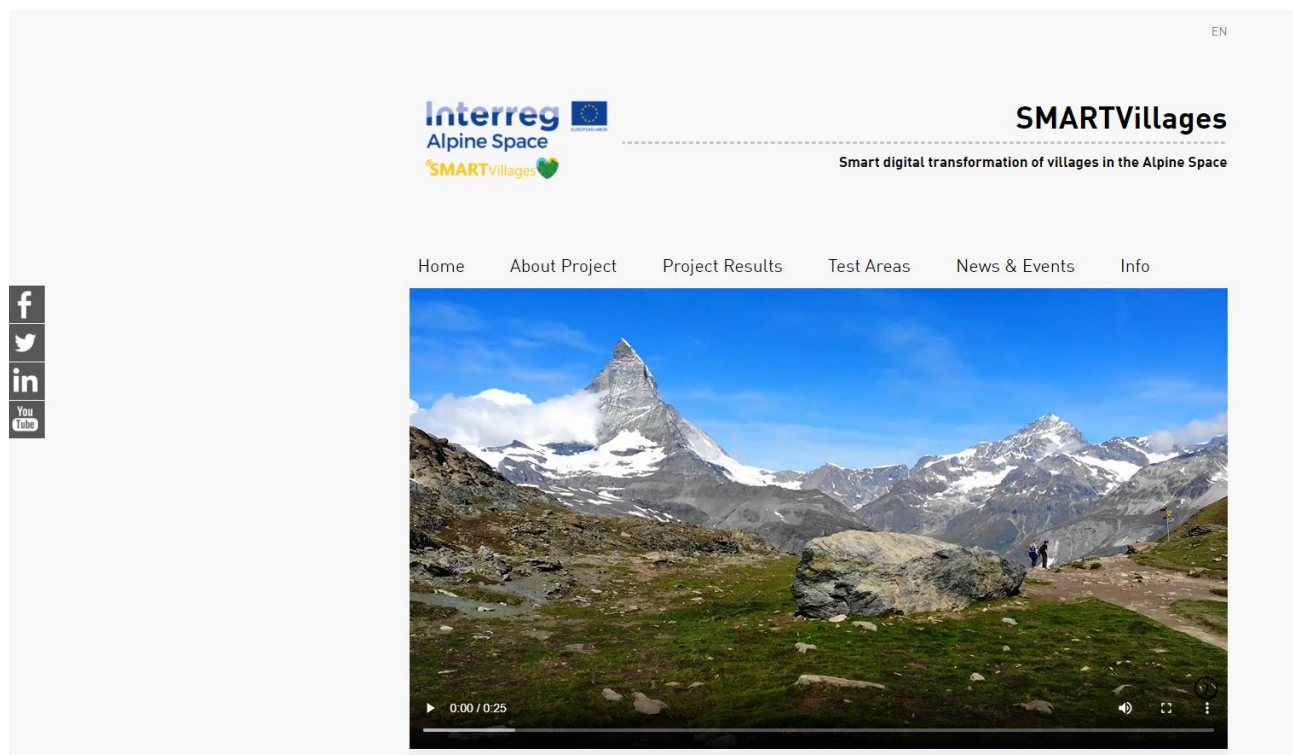

1.4 About the project

In the **About the project** section, you can find the link to the official project website, where you can learn more about the SmartVillages project or watch the project's official presentation video.

By clicking on the Visit site, you will be redirected to the official website of the project (<https://www.alpine-space.eu/projects/smartvillages/en/home>).

1.5 Access our data

In the **Access our data** section you can freely explore and download the data, collected during the project e.g., good practices, smartness evaluations etc.

Access our data

Interested in the data we gathered throughout the project? It is available for all to use. Read our documentation and access the API. Explore new possibilities and actualize your next project in Alpine Region.

[See documentation](#)

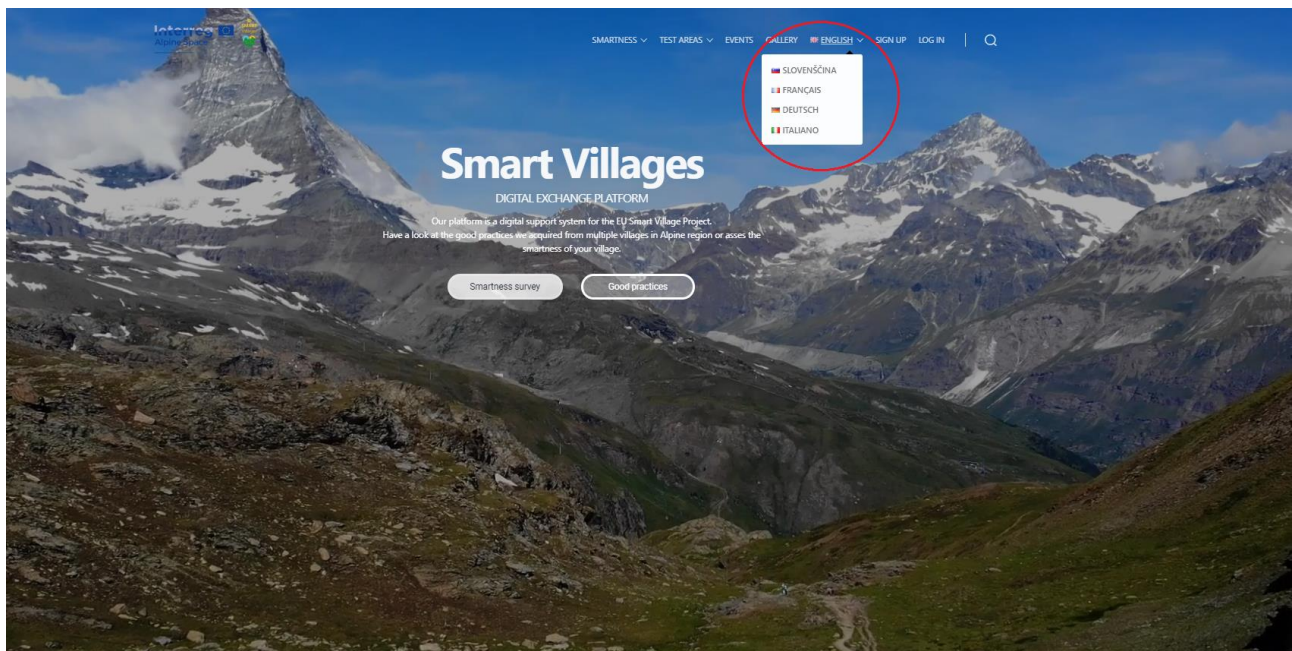

By clicking on **See documentation**, you will be taken to the Export Data page (<https://smart-villages.eu/language/en/export-data>), where you will find detail information about the accessible API endpoints, which enables programmatical data exporting. The data is structured using the common JSON format. There are three available API endpoints:

- <https://smart-villages.eu/services/api/goodpractices>
 - Presents all the good practices collected
- <https://smart-villages.eu/services/api/goodpractices/1367>
 - Presents detailed information of a specific good practice
- <https://smart-villages.eu/services/api/assessment>
 - Presents the smartness assessment evaluation data

2 Languages

The DEP is internationalized – therefore, all important content is translated into the Alpine Space languages. By hovering over the language option in the top right corner, you can choose between English, Slovenian, French, German, and Italian language.

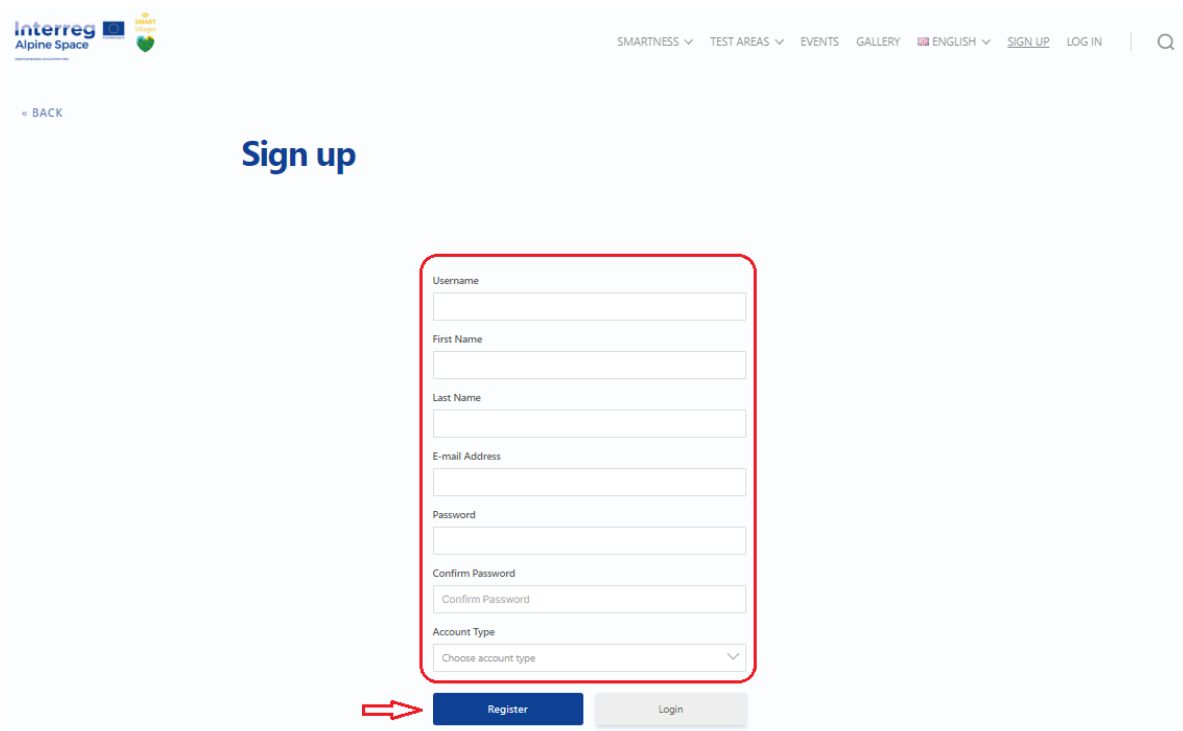

3 Create an account

To be able to access the full functionality of the Digital Exchange Platform, registration is required. The registration enables the public to participate in the project's forum discussions, as well as ease the analysis of the smartness assessment. To create an account, click on the **SIGN UP** button in the top right corner.

You will be redirected to the sign-up page, where you will have to fill out the required information and choose a password. Once you have filled out the information, click on the **Register** to create an account.

4 Login

Once you have created an account, you can log in by clicking on the LOG IN button in the top right corner.

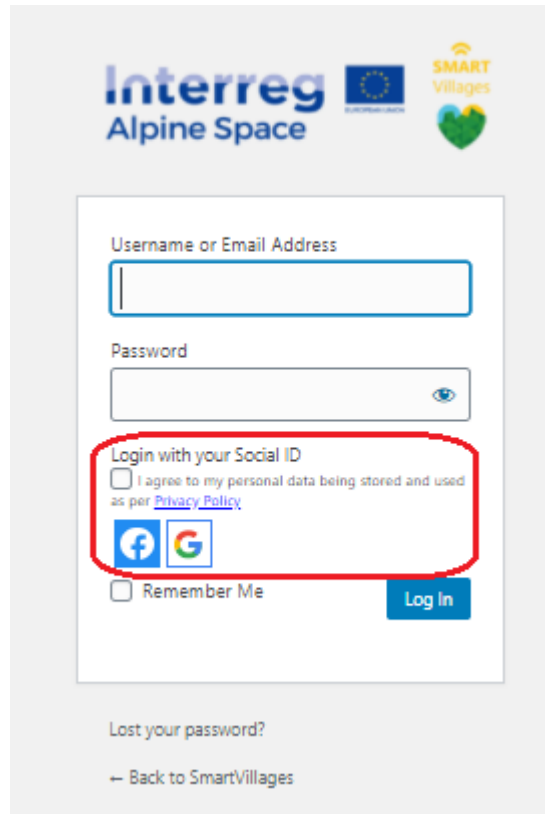

You will be redirected to the login page, where you have to enter your username and password.

The image shows the login page of the Smart Villages Digital Exchange Platform. The page has a light gray background. At the top, there are logos for Interreg Alpine Space, the European Union, and SMART Villages. The main form is a white box with a blue border. It contains the following elements: a label "Username or Email Address" above a text input field; a label "Password" above a password input field with an eye icon for toggling visibility; a section titled "Login with your Social ID" with a checkbox "I agree to my personal data being stored and used as per [Privacy Policy](#)" and two social media icons (Facebook and Google+); a checkbox "Remember Me"; and a blue "Log In" button. Below the form, there is a link "Lost your password?" and a link "← Back to SmartVillages".

4.1 Login with Social ID

Before mentioned registration and login steps could be replaced by logging in via Facebook or Google accounts.

The image shows a login page for the Interreg Alpine Space SMART Villages project. At the top, there are logos for Interreg Alpine Space, the European Union, and SMART Villages. The main login form contains two input fields: 'Username or Email Address' and 'Password'. Below these fields, there is a section titled 'Login with your Social ID' which is highlighted with a red rounded rectangle. This section includes a checkbox for 'I agree to my personal data being stored and used as per [Privacy Policy](#)', followed by Facebook and Google social media icons. Below the social ID options is a 'Remember Me' checkbox and a 'Log in' button. At the bottom of the page, there is a link for 'Lost your password?' and a link to 'Back to SmartVillages'.

4.2 Recovering lost password

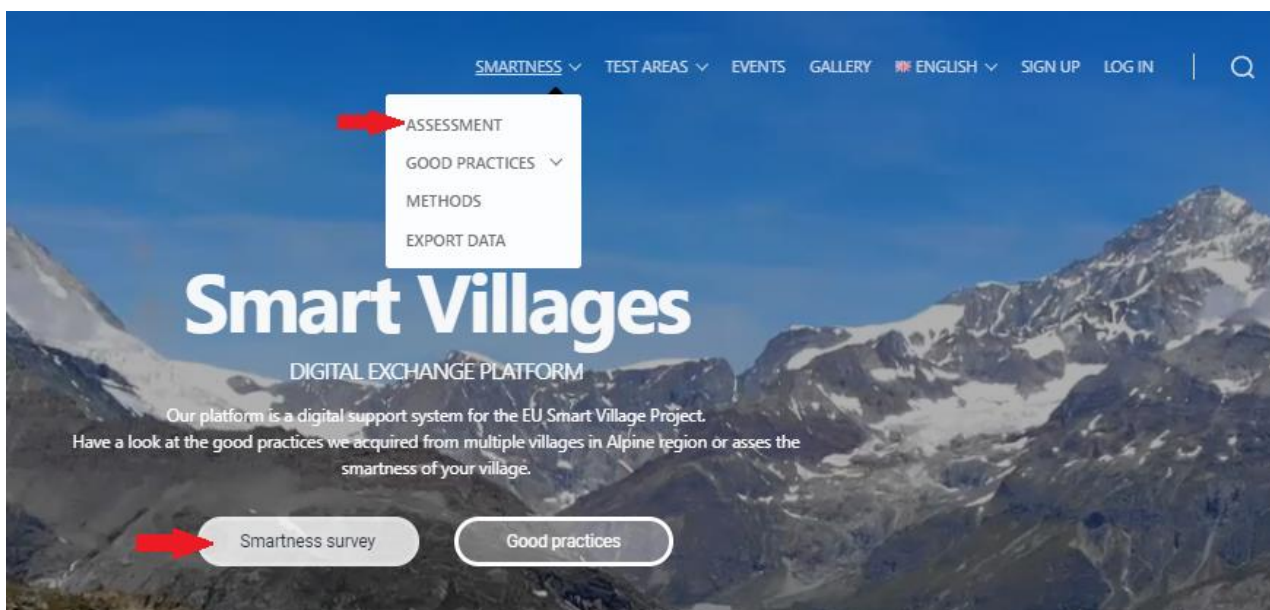

If you have lost your password, you can reset it by clicking on the **Lost your password?** button on the login page.

5 Using the Digital Exchange Platform

5.1 Smartness

5.1.1 Smartness Assessment

Assessing the level of smartness of your place of living or region is one **of the key features** of the Digital Exchange Platform. You can do this by hovering over the **Smartness** button on the top right and choosing **Assessment**, or by choosing a **Smartness Survey**.

By choosing either of the two options, you will be redirected to the Smartness survey, where you can begin assessing the smartness of your place of living or region. First, you must provide general information about the village you want to get a smartness assessment. First you have to choose the Country of the location you are assessing and after that write the location name, whereby the Google Maps API will help you with the search for the correct name of the location. You must choose the location's name proposed by the autocomplete function. In this way the DEP ensures that the locations are correct. Only locations from the Alpine Space countries can be assessed. You can input specific locations like addresses or just name of the city or region. You will also have to provide general information about the location you are assessing like the kind of the locations and the number of inhabitants, as well as some basic information about yourself. It should be noted that the assessment is fully anonymized, therefore you do not have to provide any personal information about yourself.

Smartness

11%

Step 1: General information

Filling this form will take you approximately 3-5 minutes. With the provided information we will be able to present you good practices tailored for your village.

100%

Assemble and get the best practices

Thank you for filling out the assessment form. Based on your answers, we will assemble the areas your community excels in and the areas needing improvement. After checking results, do not forget to go through the best practices from other towns that will be shown based on your results.

PREVIOUS SUBMIT

Based on your answers, the smartness assessment is provided for your location. The results are divided into four main sections. On top, you can see the smart assessment overview.

Smart assessment

Ruše, 22.12.2020

Results

❗ CRITICAL TO IMPROVE

- Smart mobility
- Smart environment

🔧 ROOM FOR IMPROVEMENT

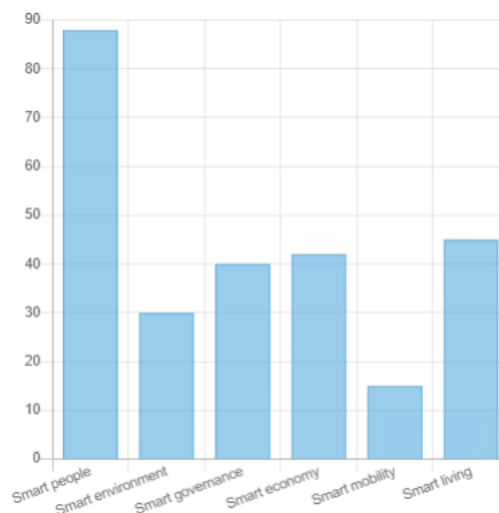

- Smart governance
- Smart economy

✅ YOU EXCELL IN

- Smart living
- Smart people

We recommend you aim to improve the critical areas in your community. To help you improve Smart mobility and Smart environment we have gathered some of the practices that proved effective in other Alpine municipalities.

Your assessment

The results present to you assessed and calculated smartness levels for each of the six dimensions. The system also shows to you the dimensions you are either **critical** or **excellent** at.

This section is followed by good practices, which provide ideas on how to improve your critical areas, whereby the **good practices are chosen according to the dimensions where you are critical to improve** or where you have some room to improve.

Good practices

IDEAS TO IMPROVE YOUR CRITICAL AREAS

SMART ECONOMY

B2B platform

📍 VIERLÄNDERREGION BODENSEE (D, CH, AT, FL), Germany

The BSM brings together what belongs together - at the B2B level! The cooperation platform for the economy in the four-country region of Lake Constance is the link that is supposed to offer support to companies during and after the Corona pandemic. There, companies can search for the resources they need or offer free capacities and other services.

✓ Applicable in rural, non city areas

📍 Local area

SMART ECONOMY

Candle – the heart among the vineyards and gastronomic excellence

📍 Podravje, Slovenia

Svečina, (German: Witschein) is a settlement in the western Slavic Hills (Slovene: Slovenske gorice) north of Plach in the Municipality of Kungota in northeastern Slovenia. The majority was attested in historical sources as Wetschin and Wetsine in 1197 Baetscheine in 1269; among other spellings). Locally, the settlement is known as Quantity. The name may be derived from the common noun * more 'council', with the initial s- possibly by association with the related word world 'advice'. In the past it was known as Witschein in German. There is a manor house in the settlement. Its foundations date to the 12th century, but the current building is late Renaissance dating to 1629 with a square floor plan and four corner turrets. It was built by the monks of St. Lambrecht's Abbey in Austria. Since 1936 it has been a secondary school, now belonging to the Agricultural College of Maribor. Notable people who were born or lived in Volume: • Andreas Perlach (1490–1551), court astrologer and chancellor of the University of Vienna Slovenske gorice, near the Slovenian-Austrian border, where the main activity of farms is focused on viticulture and fruit growing. We are known for the famous road, the heart among the vineyards; but this is only in space the actual picture of the hearty and kind people who have lived here for centuries and create a mosaic of recognition and excellence of Slovenian gastronomic richness, cultural heritage, rich natural landscape and famous people who were born here (* Andrej Perlach) or lived and lived here. They are all heroes!

✓ Applicable in rural, non city areas

The Toolbox Methods and Techniques section provides ideas on how to achieve the improvements. The DEP presents only the basic information about the related Toolbox method, however, if you wish to know more, you can click on the Read More button, and you will be transferred to the Digital Toolbox web page, whereby additional steps can be taken. Some of the assessment data is transferred as well, therefore you do not have to start from scratch.

Toolbox Methods and Tehniques

HOW TO ACHIEVE IMPROVEMENT

SMART MOBILITY , SMART GOVERNANCE , SMART ECONOMY , SMART ENVIRONMENT , SMART LIVING , SMART PEOPLE

A Venn diagram

The Venn diagram is a visual technique used to map key stakeholders, organisations, institutions and individuals in the region or community. This can be achieved with circles of different sizes, some big canvases and a mixed group of 15-20 people (3-5 is also manageable). By executing the technique, you will learn the importance and effectiveness of the chosen stakeholders and their relationship with local community and other groups. It also provides a broad guideline for plugging loopholes, if any, in the functioning of these groups.

- ⌚ 60 min or more (depends on the number of categories discussed), Recurring events
- 📍 Town , Municipality , Region
- 👥 Key informants (each for each category) and 15-20 participants (can also be 3-5).

[Read more](#)

The last section comprises an overview of the locations, which have been assessing near you in the Alpine Space area.

If you want, you can also export your assessment as a PDF file.

Smart Villages Near Me

LOCATIONS OF PREVIOUSLY ASSESSED PLACES

 Export assessment as pdf

Lastly, the results section ends with the call to the user to provide their good practices in which they are excellent at. By clicking on the Share your practices button, the user is redirected to the Good Practices submission page, where the user is asked to provide additional information and submit it.

Hello there, Smart economy expert

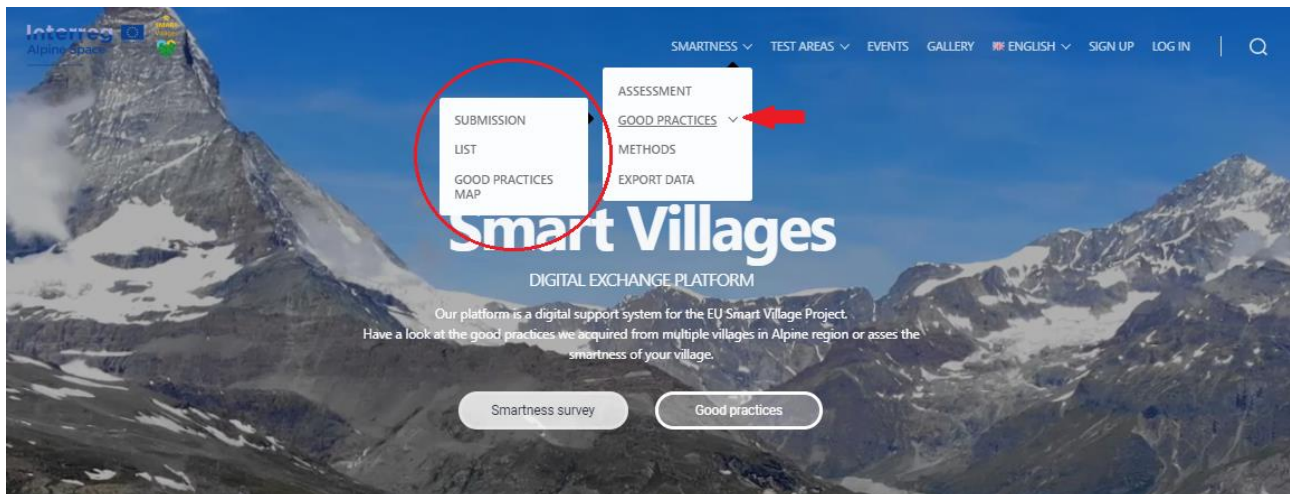

We noticed you excell in Smart economy and Smart living.

Contribute to Alpine region development and share your good practices - it will only take a minute, but will help other municipalities across Alpine regions.

Share your practices

5.1.2 Good Practices

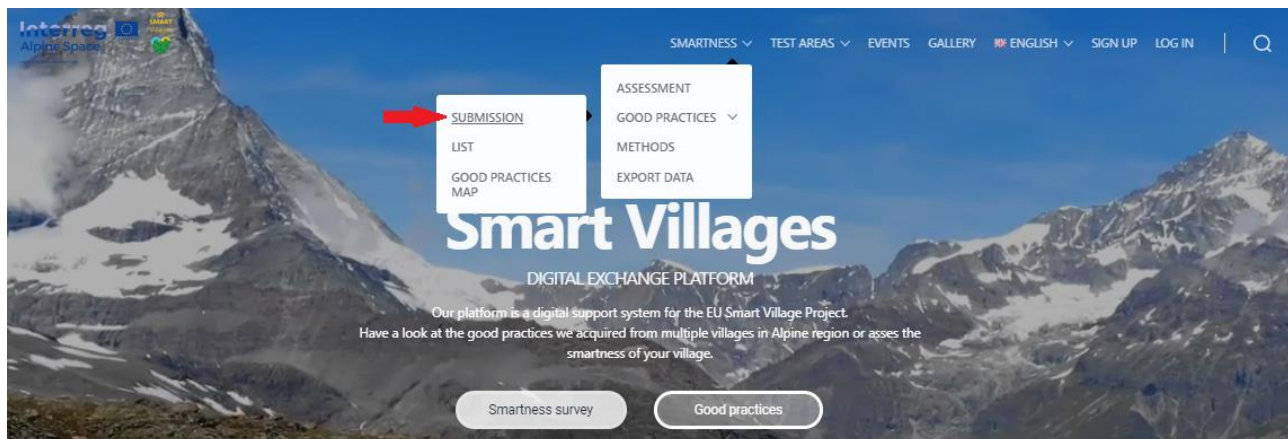

To start exploring all examples of good practices, provided by other users or submit your own example, hover over the Smartness button and then over the Good Practices button.

You will be able to choose between Submission, List, and Good practices map.

Submitting a good practice example

To submit your own example of good practice, choose Submission, under good practices.

You will be redirected to a new page (<https://smart-villages.eu/language/en/good-practices-submission/>), where you will be asked to provide details regarding the example of good practice.

General information

Title of the good practice *

Short description *

Country *

- select -

Region *

Town *

Category of smart dimension *

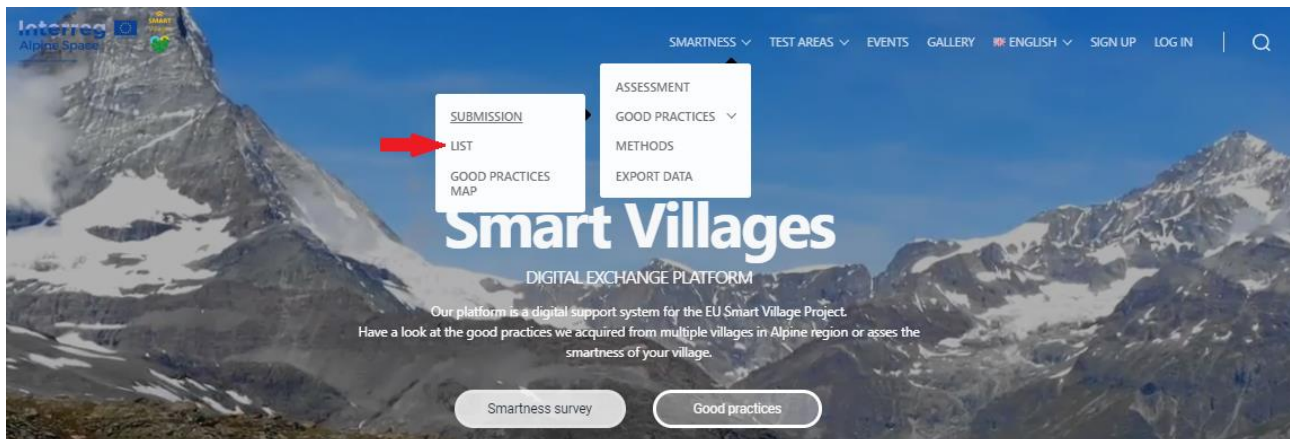

☐ Smart Economy

☐ Smart Environment

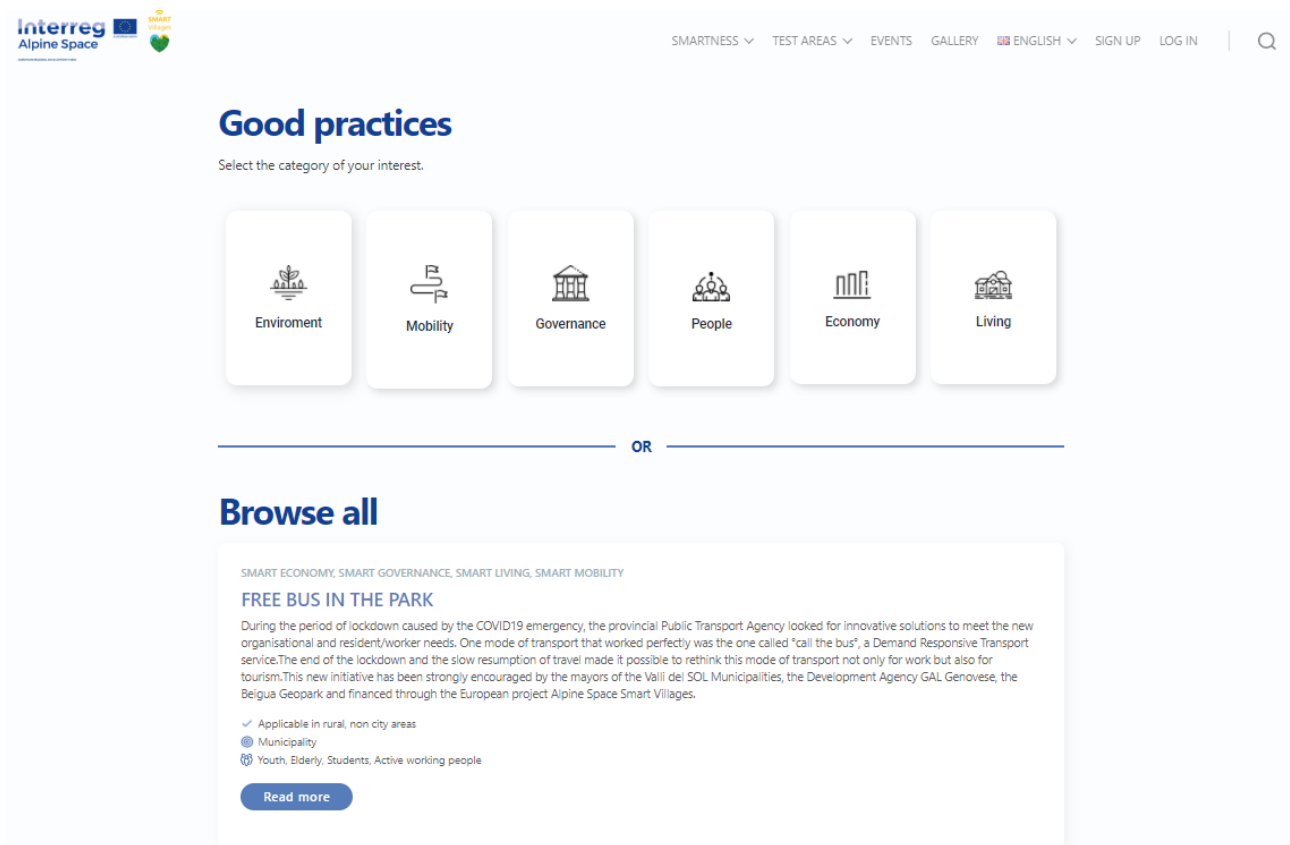

☐ Smart Governance

List of good practices

By choosing a List from the Good practices menu, you will open the page (<https://smart-villages.eu/language/en/good-practices-categories/>) where all the good practices are listed.

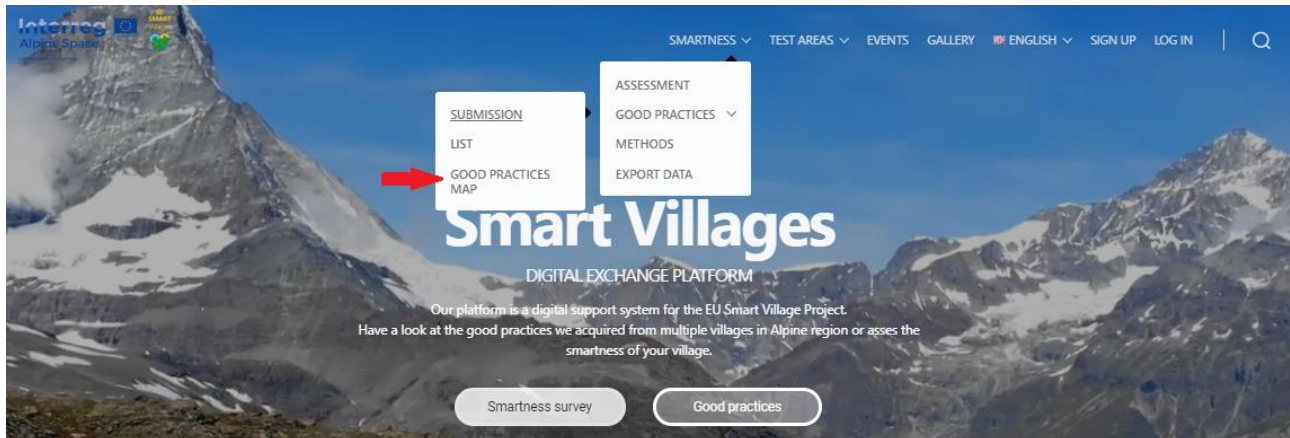

You can filter them by category (for example, Mobility) or browse all the good practices submitted.

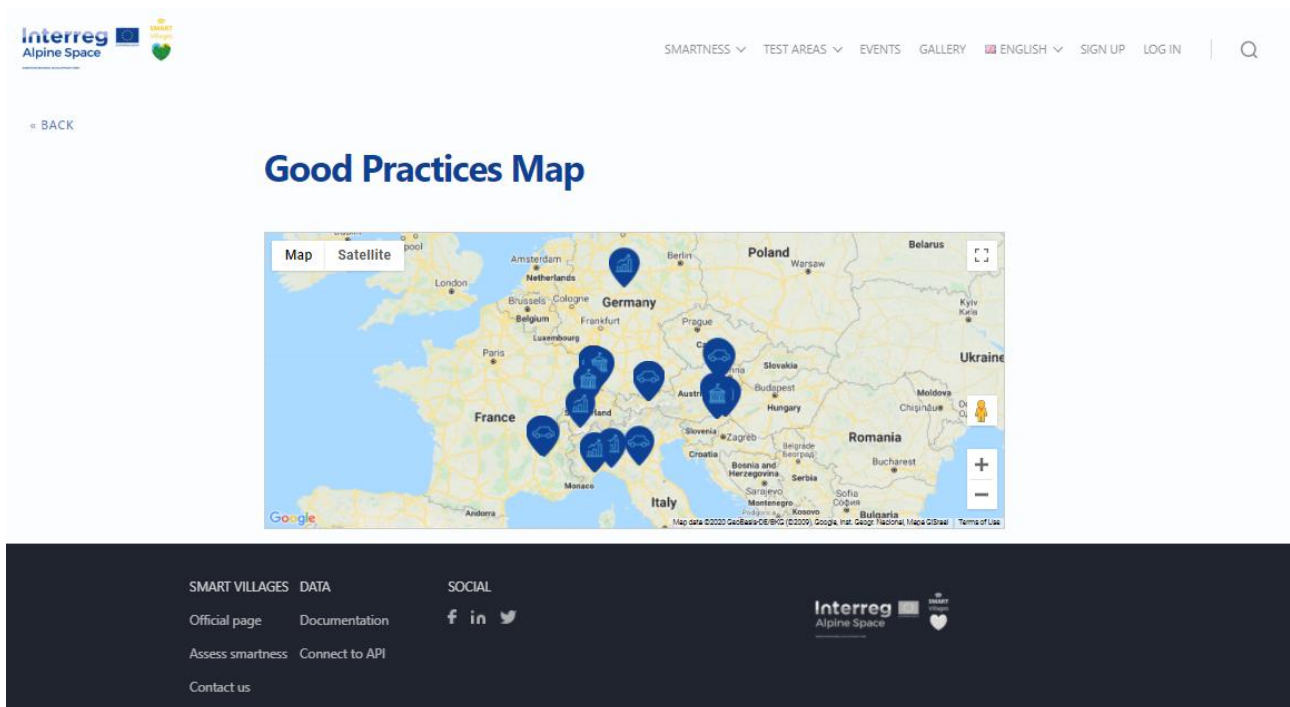

Map of good practices

By choosing **Good practices map**, you can also explore the good practices by viewing a map of the locations of available good practices.

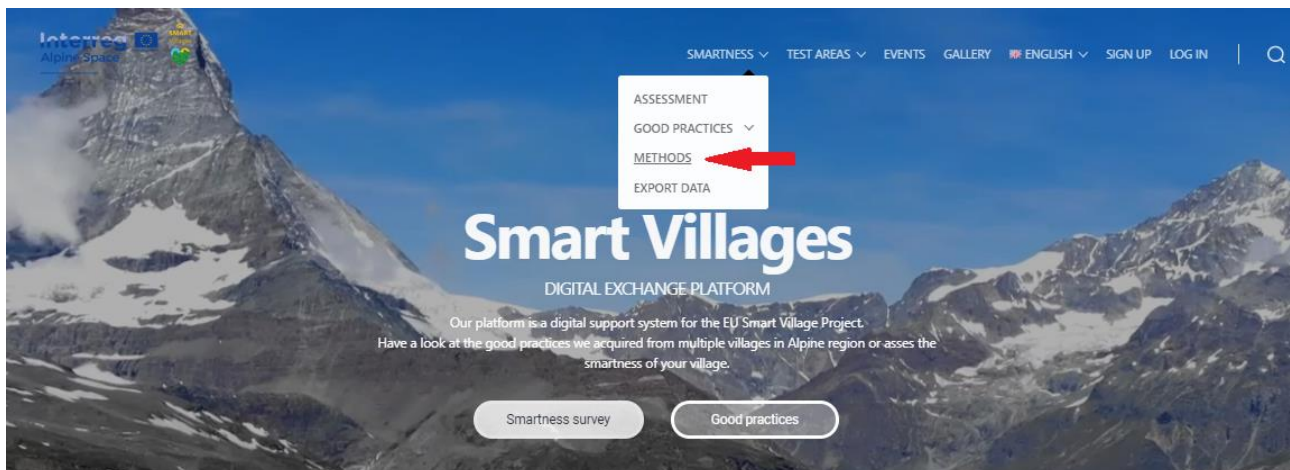

This will open the page containing a map of all the locations (<https://smart-villages.eu/language/en/good-practices-map/>), where good practices were applied. For easier differentiation between good practices, specific icons are provided based on their category.

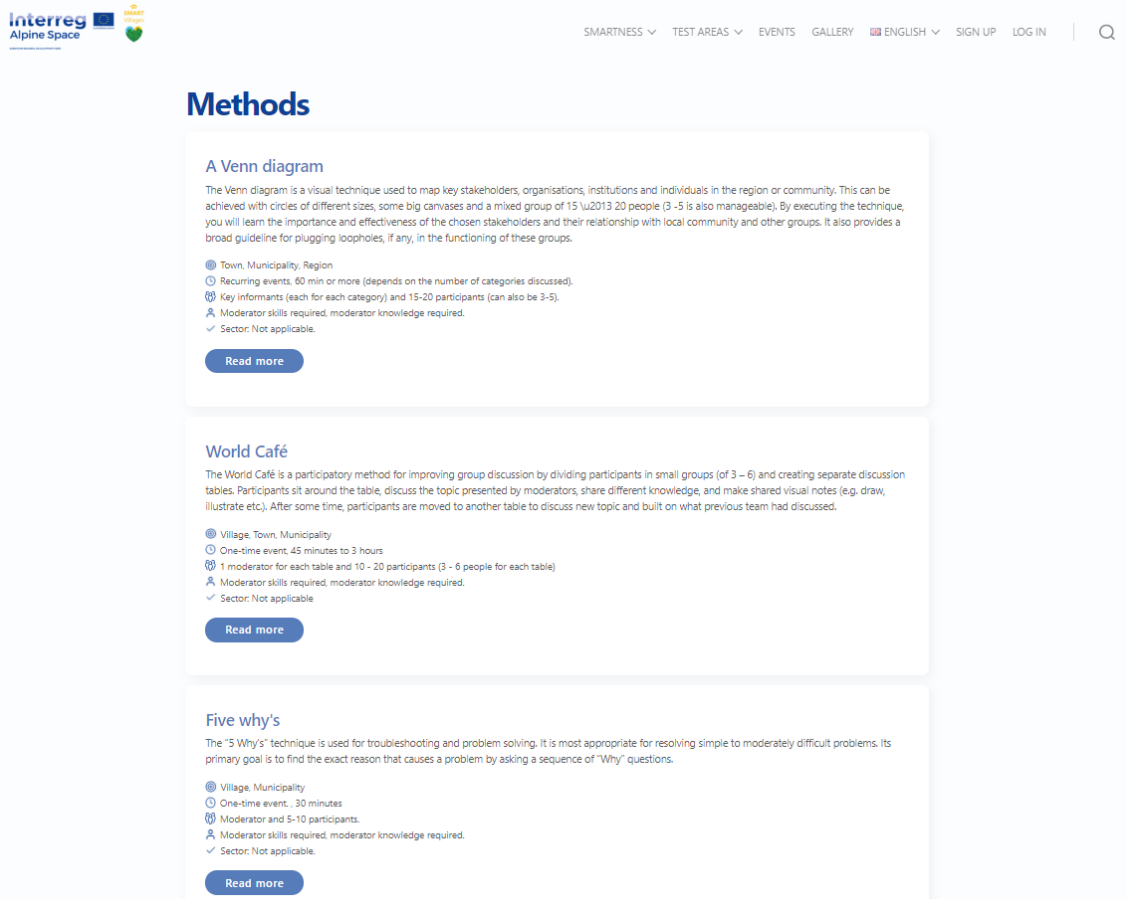

5.3 Methods

The methods page will provide you with useful information on the Toolbox methods to improve the level of smartness of your place of living or area. To open the page, hover over smartness, and then choose **Methods**.

This will take you to the page (<https://smart-villages.eu/language/en/methods/>), where you can explore different methods.

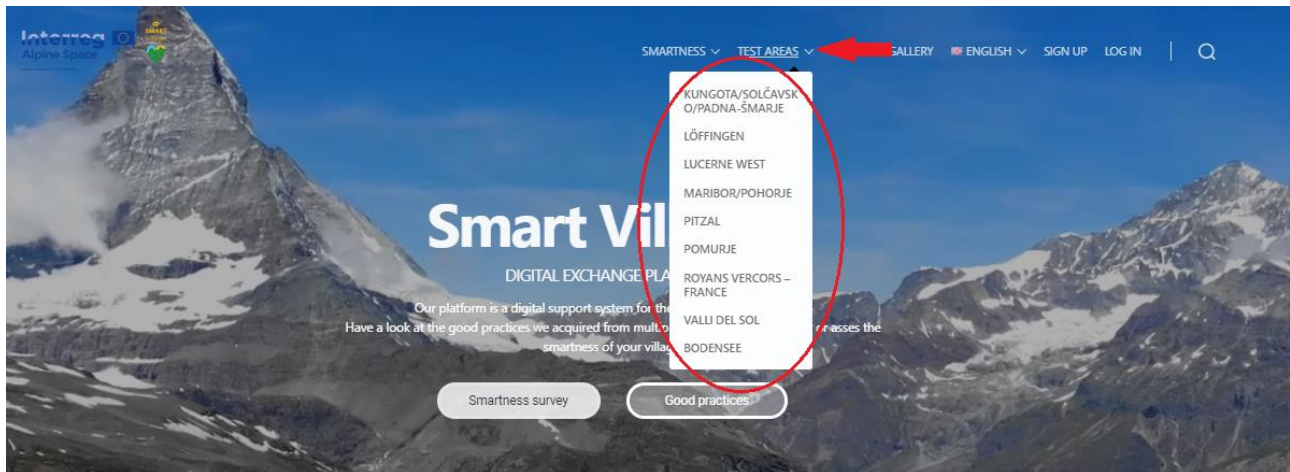

The screenshot shows the 'Methods' page on the Smart Villages Digital Exchange Platform. The page has a header with the Interreg Alpine Space logo and the SMART Villages logo. The navigation menu at the top right includes 'SMARTNESS', 'TEST AREAS', 'EVENTS', 'GALLERY', 'ENGLISH', 'SIGN UP', and 'LOG IN'. The main content area is titled 'Methods' and lists three methods:

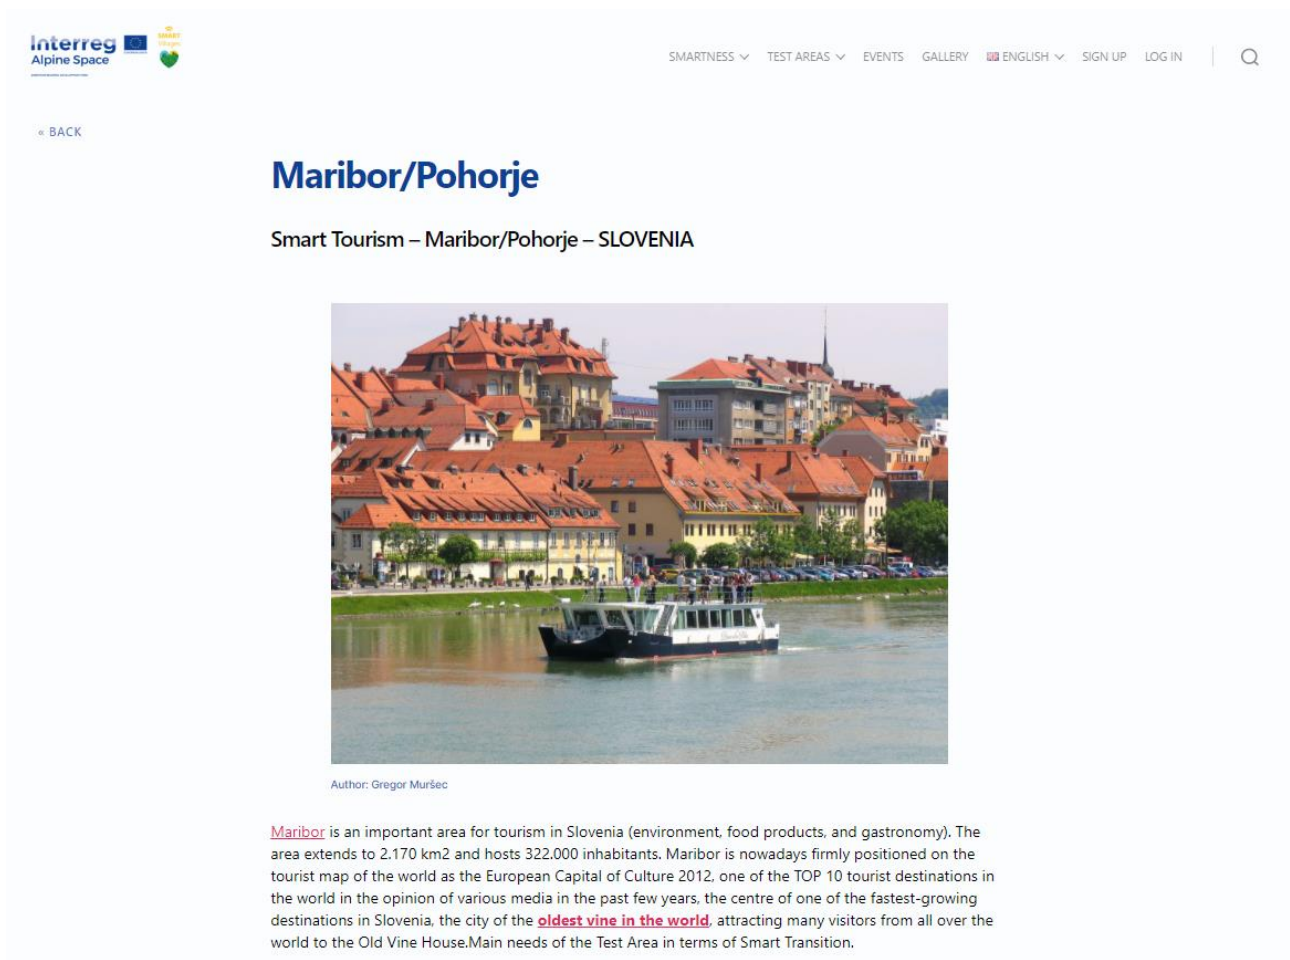

- A Venn diagram**
The Venn diagram is a visual technique used to map key stakeholders, organisations, institutions and individuals in the region or community. This can be achieved with circles of different sizes, some big canvases and a mixed group of 15 (2013 20 people (3-5 is also manageable)). By executing the technique, you will learn the importance and effectiveness of the chosen stakeholders and their relationship with local community and other groups. It also provides a broad guideline for plugging loopholes, if any, in the functioning of these groups.
 - Town, Municipality, Region
 - ⌚ Recurring events, 60 min or more (depends on the number of categories discussed).
 - 👤 Key informants (each for each category) and 15-20 participants (can also be 3-5).
 - 👤 Moderator skills required, moderator knowledge required.
 - ✓ Sector: Not applicable.[Read more](#)
- World Café**
The World Café is a participatory method for improving group discussion by dividing participants in small groups (of 3 – 6) and creating separate discussion tables. Participants sit around the table, discuss the topic presented by moderators, share different knowledge, and make shared visual notes (e.g. draw, illustrate etc.). After some time, participants are moved to another table to discuss new topic and built on what previous team had discussed.
 - Village, Town, Municipality
 - ⌚ One-time event, 45 minutes to 3 hours
 - 👤 1 moderator for each table and 10 - 20 participants (3 - 6 people for each table)
 - 👤 Moderator skills required, moderator knowledge required.
 - ✓ Sector: Not applicable[Read more](#)
- Five why's**
The "5 Why's" technique is used for troubleshooting and problem solving. It is most appropriate for resolving simple to moderately difficult problems. Its primary goal is to find the exact reason that causes a problem by asking a sequence of "Why" questions.
 - Village, Municipality
 - ⌚ One-time event, 30 minutes
 - 👤 Moderator and 5-10 participants.
 - 👤 Moderator skills required, moderator knowledge required.
 - ✓ Sector: Not applicable.[Read more](#)

6 Test areas

By hovering over Test areas in the top right, a drop-down menu will appear, where you can choose one of the project's test area to explore.

By clicking on a test area of your choice, you will be taken to the area's page.

7 Events

By clicking on Events on the homepage, a page will appear (<https://smart-villages.eu/events/>), where you can find a calendar with all the events of the SmartVillages project.

On the Forum page you can search, read, and contribute to the desired forum topic.

The screenshot shows the 'Forum' page of the Interreg Alpine Space website. The page has a navigation bar with links for SMARTNESS, TEST AREAS, EVENTS, GALLERY, COLLABORATION, and a language selector set to ENGLISH. A search bar is located in the top right corner. Below the navigation bar, there is a 'Forum' section with a 'SmartVillages Project Consortium' header. The forum is organized into a table with two columns: 'SmartVillages Project Consortium' and 'Last post'. The table lists several topics, including 'WPM - Management', 'WP1 - Regional Analysis', 'WP2 - Digital Exchange Platform', 'WP3 - Tool Box', 'WP4 - Policy Recommendations', and 'WPC - Communication'. Each topic is accompanied by a user profile icon, a title, and a brief description of the last post.

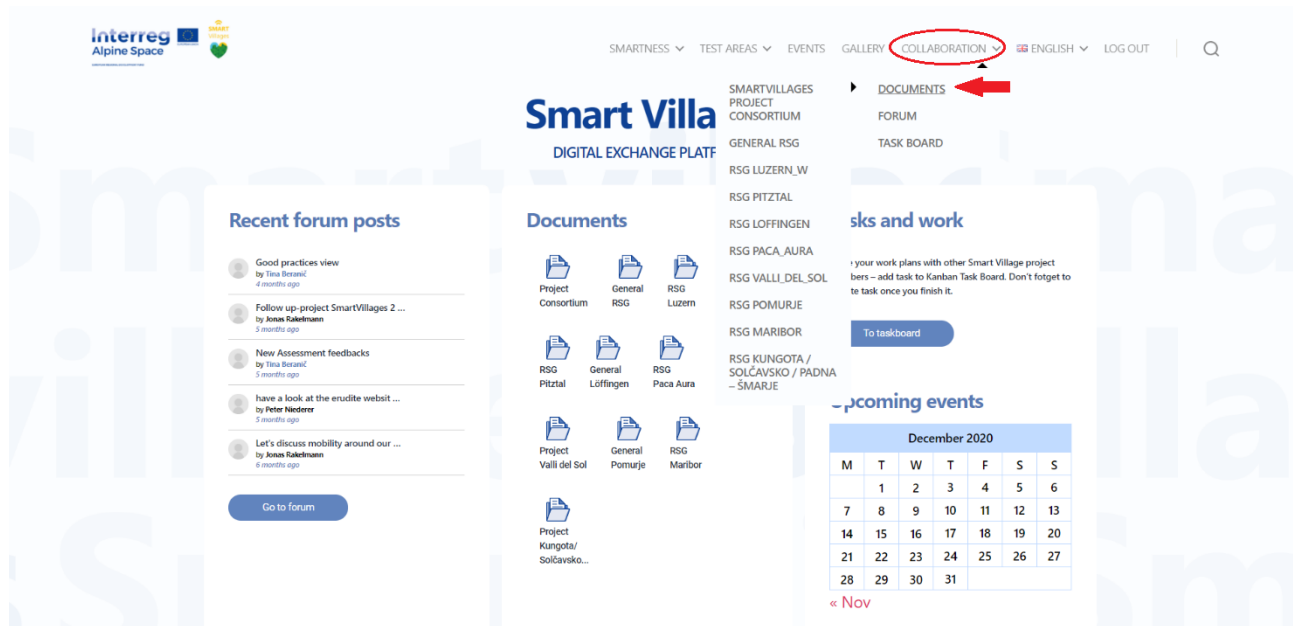

On this page, you can also manage subscriptions. You can choose between *Individual Subscriptions*, where you get notified about activity in forums and topics you are subscribed to; *New Topics*, where you get notified about all new topics; and *New Topics & Posts*, where you get notified about all new topics and posts.

The screenshot shows the 'Subscriptions' page of the Interreg Alpine Space website. The page has a navigation bar with links for SMARTNESS, TEST AREAS, EVENTS, GALLERY, COLLABORATION, and a language selector set to ENGLISH. A search bar is located in the top right corner. Below the navigation bar, there is a 'Subscriptions' section with a 'Subscription Settings' header. The settings are organized into a table with three columns: 'Individual Subscriptions', 'New Topics', and 'New Topics & Posts'. Each column has a radio button and a description of the notification settings. The 'New Topics & Posts' option is selected. Below the table, there are two sections: 'Notify about new posts in:' and 'Notify about new topics in:'. Each section has a dropdown menu and a description of the notification settings.

9.2 Documents

By choosing the Documents section in the menu (<https://smart-villages.eu/language/en/documents/smartvillages-project-consortium/>), you will be redirected to the SV Project Consortium documents page.

WP - forum subscription settings (Lucija B)
- SmartVillages
Service API for Matchmaking (Matej B)
- Add a project
WP - migration to new server (Lucija B)

9.4 Smartness – additional functionality

If you are a logged user that has already submitted a smartness assessment (<https://smart-villages.eu/language/en/smartness/>), you can click on the *Use saved data* button to upload it, whereby answers from your previous smartness assessment will be populated – thus enabling you to make a fast forward through the assessment or maybe modified it slightly and compare the new results with your previous ones.

Smartness

11%

Hi Lucija Brezočnik! Would you like to use the data from your last assessment from November 30, 2020?

USE SAVED DATA

Step 1: General information

Filling this form will take you approximately 3-5 minutes. With the provided information we will be able to present you good practices tailored for your village.

Village name *
