Alpine Space Programme 2007 – 2013

50+

transnational projects

Climate change, integrated mobility or innovations do not know national borders and require joint management solutions. From 2007 to 2013, the Alpine Space Programme has funded more than 50 projects for transnational cooperation to commonly tackle Alpine specific challenges.

Within a period of 2 to 3 years, projects bring together organisations from 7 Alpine countries to develop, test and transfer strategies and tools for sustainable regional development.

Find out about how these projects are already contributing to the objectives of the Europe 2020 Strategy towards smart, sustainable and inclusive growth in **6 thematic fields:**

CLIMATE CHANGE

COMPETITIVENESS &
INNOVATION OF
SMEs

INCLUSIVE GROWTH

LOW-CARBON
ECONOMY AND
ENERGY EFFICIENCY

RESOURCE EFFICIENCY
AND ECOSYSTEM
MANAGEMENT

SUSTAINABLE
TRANSPORT &
MOBILITY

Alpine Space Programme 2007 – 2013 in short

+ Framework

The programme is part of the European Territorial Cooperation objective of the EU Cohesion Policy which aims at strengthening economic and social cohesion in the European Union.

+ Duration

2007 – 2013 | Implementation will last until 2015

+ Budget

130 million euro, of which 98 million euro from ERDF | European Regional Development Fund

+ Participating countries

Austria, France, Germany, Italy, Liechtenstein, Slovenia, Switzerland

+ Calls for project proposals

5 | in 2008, 2009, 2011, 2012 and 2013

+ Co-funded projects

Over 50

+ Involved partners

Over 600

Looking ahead

The Alpine Space Programme will continue to promote transnational cooperation in the Alps within the framework of the European Cohesion Policy.

To prepare for the future, the programme has run a two-year inclusive process for medium to long-term strategic orientation and priorities for the Alpine Space.

Learn about the results of this process and the future programme on the website.
