

Greetings from the
Alpine Space Programme

SPHERA

The programme is co-funded
by the European Regional
Development Fund

SPHERA

Alpine healthcare systems are faced with numerous challenges, thus demanding a change towards sustainable health models and governance of health systems.

SPHERA has capitalised on the results of projects focusing on inclusive growth in order to integrate healthcare in spatial planning at a transnational level. Furthermore, the project plans to contribute to the EU Cohesion Policy, by developing health and spatial planning policies based on a gap analysis that has been conducted in those fields. SPHERA will therefore pave the way for new projects to improve territorial governance in the Alpine Space, particularly for spatial planning and health systems, both at a transnational and EU level.

Expected key achievements

- + Spatial planning perspective integrating healthcare
- + Gap analysis providing policy orientation for the Alpine Space Programme
- + Methodological guideline for future projects

EU support (ERDF) of over € 375,000
Duration 09.2013 - 12.2014

Spatial planning and Health Systems: enhancing territorial governance in the Alpine Space
