

Greetings from the
Alpine Space Programme

SusFreight

The programme is co-funded
by the European Regional
Development Fund

SusFreight

The increase in freight transport across the Alps has, over time, led to environmentally and economically threatening situations.

By capitalising on previous project results, SusFreight aims to bring consistency to current and future transport policies, while addressing environmental problems tied to a heavy flow of traffic. After mapping the needs of all relevant stakeholders, the project has presented recommendations and raised awareness among policy makers on various levels, so as to hopefully increase sustainable freight transport in the future.

Expected key achievements

- + Recommendation paper for future policy development
- + Policy organisation chart
- + Report on strategic achievements and improvement proposals 2014+

EU support (ERDF) of over € 393,000

Duration 09.2013 - 11.2014

Sustainable Freight Transport – Now and Tomorrow
